*Introduction: In 2016, it is estimated that approximately 12,500 American women will be diagnosed with cervical cancer and about 4,100 women will die from the disease (American Cancer Society, 2015). A recent study showed that there has been a 5.5% decrease in Pap test screening over the period of 2008-2013 (84.5% to 80.7%) (Sabatino, White, Thompson, & Klabunde, 2015). This is a troublesome statistic, since the Healthy People 2020 target of 93% has yet to be met (Healthy People 2020, 2014a). This urgent public health issue needs to be addressed. Although some studies have looked at predictors of Pap test screening (Eaker, Adami, & Sparen, 2001; Gu, 2010; Kahn, Goodman, Slap, Huang, & Emans, 2001) there is a gap in health behavior research examining the psychosocial factors that predict American women's failure to meet Pap test screening national recommendations (Chan, Yang, Gu, Wang, & Tao, 2015). This dissertation consisted of two studies: 1) *Racial/Ethnic Disparities, Body Weight, and Other Psychosocial Antecedents that Predict Women's Failure to Meet Pap Test Screening National Recommendations* and 2) *Using the Modified Integrated Behavioral Model to Validate a Path Model of Women's Failure to Meet Pap Test Screening National Recommendations*. The aim of both studies was to identify psychosocial variables explaining and predicting adult women's failure to meet Pap test screening national recommendations. Methods: The first study was a secondary data analysis of the 2014 National Cancer*

Institute's nationally representative HINTS 4 Cycle 4 data. The second study was an original, cross-sectional web survey using a modified Integrated Behavioral Model (IBM) to explain and predict failure to meet Pap test screening national recommendations. The outcome variable for both studies was failure to meet Pap test screening national recommendations. For the first study, the explanatory variables were identified based off the psychosocial and demographic correlates of HINTS 4 Cycle 4. Regarding the original study, an extensive literature review informed the explanatory variables used to examine women's failure to meet Pap test screening national recommendations. For both studies, statistical analyses were conducted using IBM Statistical Package for the Social Sciences (SPSS), version 21.0. The original study's path model analysis was conducted using EQS 6.1. Demographic characteristics of respondents for both studies were summarized via descriptive statistics. Bivariate analyses for both studies were performed to evaluate the relationships between failure to meet Pap test screening national recommendations and the explanatory variables. For both studies, stepwise multiple binary logistic regression was conducted to identify the significant predictors of failure to meet Pap test screening national recommendations among women aged 21-65. Path analysis was conducted in the second study to identify the best-fit model. Results: The first study showed that women with the following characteristics tend to fail to meet the Pap test

screening national recommendations with statistical significance: 1) being Asian, White, or African American (vs. Hispanic); 2) being underweight or normal weight 3) fail to meet USPSTF mammography recommendation (vs. met); 4) having more symptoms of depression and anxiety within the past two years; 5) having last routine check-up by a doctor more than 2 years (vs. within 2 years); 6) being older than 35 (vs. aged 21-35); 7) being single, divorced/separated, or widowed (vs. married/living as married); and 8) having less education (vs. college graduate or more). For the second study, bivariate analysis indicated that failure to meet Pap test screening national recommendations was significantly associated with the following demographic characteristics: 1) having lower income (vs. higher income level); 2) having less education (vs. college graduate or more); and 3) being older than 35 (vs. aged 21-35). The path analyses revealed that Self-efficacy was the strongest predictor of Pap test screening Intentions ($\beta=0.24$, p

This book offers clear, up-to-date guidance on how to report cytologic findings in cervical, vaginal and anal samples in accordance with the 2014 Bethesda System Update. The new edition has been expanded and revised to take into account the advances and experience of the past decade. A new chapter has been added, the terminology and text have been updated, and various terminological and morphologic questions have been clarified. In addition, new images are included that reflect the experience gained with liquid-based cytology since the

publication of the last edition in 2004. Among more than 300 images, some represent classic examples of an entity while others illustrate interpretative dilemmas, borderline cytomorphic features or mimics of epithelial abnormalities. The Bethesda System for Reporting Cervical Cytology, with its user-friendly format, is a “must have” for pathologists, cytopathologists, pathology residents, cytotechnologists, and clinicians. With legions of Parademons on the attack, Constantine forges an alliance with Doctor Fate. But as time begins to run out, will they escape Earth 2--or help destroy it? Engineering Design with SolidWorks 2013 and Video Instruction is written to assist students, designers, engineers and professionals. The book provides a solid foundation in SolidWorks by utilizing projects with step-by-step instructions for the beginner to intermediate SolidWorks user. Explore the user interface, CommandManager, menus, toolbars and modeling techniques to create parts, assemblies and drawings in an engineering environment. Follow the step-by-step instructions and develop multiple parts and assemblies that combine machined, plastic and sheet metal components. Formulate the skills to create, modify and edit sketches and solid features. Learn the techniques to reuse features, parts and assemblies through symmetry, patterns, copied components, design tables, Bills of Materials, Custom Properties and Configurations. Address various SolidWorks analysis tools: SimulationXpress, Sustainability /

SustainabilityXpress and DFMXpress and Intelligent Modeling techniques. Learn by doing, not just by reading! Desired outcomes and usage competencies are listed for each project. Know your objective up front. Follow the steps in Project 1 - 8 to achieve the design goals. Work between multiple documents, features, commands and custom properties that represent how engineers and designers utilize SolidWorks in industry. Review individual features, commands and tools with the enclosed Video Instruction DVD. The projects contain exercises. The exercises analyze and examine usage competencies. Collaborate with leading industry suppliers such as SMC Corporation of America, Boston Gear and 80/20 Inc. Collaborative information translates into numerous formats such as paper drawings, electronic files, rendered images and animations. On-line intelligent catalogs guide designers to the product that meets both their geometric requirements and performance functionality. The authors developed the industry scenarios by combining their own industry experience with the knowledge of engineers, department managers, vendors and manufacturers. These professionals are directly involved with SolidWorks every day. Their responsibilities go far beyond the creation of just a 3D model. The book is design to compliment the SolidWorks Tutorials contained in SolidWorks 2013. There are over 2.5 hours of video instructions on the enclosed DVD. Happy Birthday Notebook Daily Diary / journal / notebook to write in, for creative

writing, for creating lists, for writing notes, for Scheduling, Recording your thoughts or just to say organized. Makes an excellent Birthday gift for any special person in your life. Perfect present for a Birthday Girl or Birthday Boy. Wide ruled, lined paper Perfectly sized at: 6 x 9.120 lined pages. high-quality matte cover. high-quality smooth white pap [After payment, write to & get a FREE-of-charge, unprotected true-PDF from: Sales@ChineseStandard.net] This standard specifies the determination principle, requirements, test method, marks, instructions, packaging, transport and storage, etc. of total cholesterol kit (COD-PAP method). This standard applies to the quality control of liquid-type total cholesterol kit (COD-PAP method) of single reagent and double reagent used for quantitative inspection in medical laboratory. Happy Birthday Notebook Daily Diary / journal / notebook to write in, for creative writing, for creating lists, for writing notes, for Scheduling, Recording your thoughts or just to say organized. Makes an excellent Birthday gift for any special person in your life. Perfect present for a Birthday Girl or Birthday Boy. Wide ruled, lined paper Perfectly sized at: 6 x 9.120 lined pages. high-quality matte cover. high-quality smooth white pap Concise, portable, and user-friendly, The Washington Manual® of Patient Safety and Quality Improvement covers essential information in every area of this complex field. With a focus on improving systems and processes, preventing errors, and promoting transparency, this practical reference provides an

overview of PS/QI fundamentals, as well as insight into how these principles apply to a variety of clinical settings. Part of the popular Washington Manual® series, this unique volume provides the knowledge and skills necessary for an effective, proactive approach to patient safety and quality improvement. Apnea: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Diagnosis and Screening in a concise format. The editors have built Apnea: New Insights for the Healthcare Professional: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Diagnosis and Screening in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Apnea: New Insights for the Healthcare Professional: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. This book contains a selection of refereed papers presented at the “International Conference on Operations Research (OR 2013)” which took place at Erasmus University Rotterdam

September 3-6, 2013. The conference was jointly organized by the German and the Dutch OR Society. More than 800 scientists and students from over 50 countries attended OR 2013 and presented more than 600 papers in parallel topical streams, as well as special award sessions. The theme of the conference and its proceedings is "Impact on People, Business and Society". All of the legal forms and documents necessary to allow individuals and families to handle their own day-to-day legal problems without the need for an attorney. Background: Anasal PAP mask assembly was shown to improve oxygenation by maintaining spontaneous respiration in sedated obese OSA patients or patients with difficult airway during awake/sleep endotracheal intubation (ETI) (Fig. 1) (1-6). We report its use in a patient with a mandibular mass during ETI. Case Report: A 66 y/o cachectic male with A-Fib, RBBB, HTN, anemia, NIDDM, bipolar disorder, schizophrenia, lung cancer s/p RUL lobectomy, thyroid mass (2.6x4.8 cm) and necrotic mandibular sarcoma (4.4x7.4 cm) presented for resection and reconstruction. The mass extended to his lower lip. He had a Mallampati class IV airway and poor face-mask-fit. The patient gave his consent for using a modified nasal mask and taking photographs for educational purpose. A modified infant mask (Fig. 2) was secured over his nose with head-straps and connected to the anaesthesia machine via a breathing circuit. The APL valve was adjusted to deliver 5-6 cm H₂O CPAP with O₂ (4L/min). Deep sedation was titrated

with 100 mg lignocaine and small boluses of propofol (6x50 mg). He maintained spontaneous ventilation and 100% SpO₂ with pressure-control (PC) ventilation (PIP 13 cm H₂O, PEEP 5, RR 20). Video-laryngoscopy (VL) revealed a grade II laryngeal view (Fig. 3-5). Rocuronium (50 mg) was administered to relax the vocal cords in order to advance FOB. However, ETT met resistance about 4 cm below the vocal cords. After inserting a rigid stylet, ETT was advanced smoothly. FOB revealed no tracheal bleeding. The large mandibular mass was revealed after removing the dressing (Fig. 6). He maintained 100% SpO₂ during intubation and tolerated the procedure well. He was kept intubated and sedated (Fig. 7). The patient was extubated next afternoon.

Discussion: This modified nasal CPAP mask assembly provided continuous active oxygenation in a patient with a large mandibular mass and difficult airway during VL-guided FOI. It maintained spontaneous nasal ventilation and subsequently provided PC nasal ventilation. It allows calm attempts to perform VL/FOI and may improve patient safety.

References: 1. www.TSEMMask.com; 2. SAMBA 28th AM, 2013; 3. SASM 3rd AM, 2013; 4. ASA AM, 2013; 5. SAM AM, 2014; 6. ASA AM, 2014

Learning points: 1. How to construct this nasal PAP mask assembly. 2: How to provide optimum nasal CPAP to maintain spontaneous respiration. 3: How to perform awake/sedated combined FOB/VL ETI with continuous active nasal oxygenation.

A comprehensive text covering all aspects of wave and tidal energy

Wave and Tidal Energy provides a comprehensive and self-contained review of the developing marine renewable energy sector, drawing from the latest research and from the experience of device testing. The book has a twofold objective: to provide an overview of wave and tidal energy suitable for newcomers to the field and to serve as a reference text for advanced study and practice. Including detail on key issues such as resource characterisation, wave and tidal technology, power systems, numerical and physical modelling, environmental impact and policy. The book also includes an up-to-date review of developments worldwide and case studies of selected projects.

Key features: A comprehensive and self-contained text covering all aspects of the multidisciplinary fields of wave and tidal energy. Draws upon the latest research in wave and tidal energy and the experience of leading practitioners in numerical and laboratory modelling. Regional developments worldwide are reviewed and representative projects are presented as case studies. Wave and Tidal Energy is an invaluable resource to a wide range of readers, from

engineering students to technical managers and policymakers to postgraduate students and researchers. Biomaterials for Organ and Tissue Regeneration: New Technologies and Future Prospects examines the use of biomaterials in applications related to artificial tissues and organs. With a strong focus on fundamental and traditional tissue engineering strategies, the book also examines how emerging and enabling technologies are being developed and applied. Sections provide essential information on biomaterial, cell properties and cell types used in organ generation. A section on state-of-the-art in organ regeneration for clinical purposes is followed by a discussion on enabling technologies, such as bioprinting, on chip organ systems and in silico simulations. Provides a systematic overview of the field, from fundamentals, to current challenges and opportunities Encompasses the classic paradigm of tissue engineering for creation of new functional tissue Discusses enabling technologies such as bioprinting, organ-on-chip systems and in silico simulations Human Papillomavirus: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Diagnosis and Screening. <http://www.ScholarlyEditions.com/>. OVERVIEW Chad approved its National Development Plan (NDP) for the period 2013-15 in May 2013. The NDP is considered the third poverty reduction strategy for Chad, following the ones adopted for the periods 2003-06 and 2008-11. It focuses on a sensible set of priorities, notably on (i) developing production capacities and job opportunities, (ii) mobilizing and developing human capital and combating inequality, poverty, and social exclusion, (iii) protecting environment and combating climate change, and (iv) strengthening governance. The NDP was built on lessons learned from the previous poverty reduction strategies and benefited from a wide-ranging process of consultations. The main features of the NDP were discussed in the Joint Staff Advisory Note distributed to Boards of Executive Directors on June 20, 2013.¹ Staffs acknowledged in that note the

comprehensiveness and relevance of the strategy to accelerate growth and reduce poverty, while underscoring the lack of intra- and inter-sectoral prioritization, as well as the need for greater elaboration of the Government's plans to strengthen public investment management and protect government finances against oil price fluctuations. This is the story of the Singapore healthcare system: how it works, how it is financed, its history, where it is going, and what lessons it may hold for national health systems around the world. Singapore ranks sixth in the world in healthcare outcomes, yet spends proportionally less on healthcare than any other high-income country. This is the first book to set out a comprehensive system-level description of healthcare in Singapore, with a view to understanding what can be learned from its unique system design and development path. The lessons from Singapore will be of interest to those currently planning the future of healthcare in emerging economies, as well as those engaged in the urgent debates on healthcare in the wealthier countries faced with serious long-term challenges in healthcare financing. Policymakers, legislators, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think tanks should understand how the Singapore system works to achieve affordable excellence. This book, consisting of 21 articles, including three review papers, written by research groups of experts in the field, considers recent research on

reinforced polymer composites. Most of them relate to the fiber-reinforced polymer composites, which are a real hot topic in the field. Depending on the reinforcing fiber nature, such composites are divided into synthetic and natural fiber-reinforced ones. Synthetic fibers, such as carbon, glass, or basalt, provide more stiffness, while natural fibers, such as jute, flax, bamboo, kenaf, and others, are inexpensive and biodegradable, making them environmentally friendly. To acquire the benefits of design flexibility and recycling possibilities, natural reinforcers can be hybridized with small amounts of synthetic fibers to make them more desirable for technical applications. Elaborated composites have great potential as structural materials in automotive, marine and aerospace application, as fire resistant concrete, in bridge systems, as mechanical gear pair, as biomedical materials for dentistry and orthopedic application and tissue engineering, as well as functional materials such as proton-exchange membranes, biodegradable superabsorbent resins and polymer electrolytes. Urgent action is required to establish the numbers of primates kept in captivity by private individuals across the UK and to improve their welfare. Little is known about the types and numbers of primates being kept or traded by private individuals in the UK and about the manner in which they are being kept. A ban is not ruled out, but such a step must be based on solid evidence and cannot be imposed before every opportunity to improve the operation of our existing framework has been exhausted. Defra should

commission independent research to establish the extent of the problems in this area and to report with a plan of action within six months of receiving the research results. The Government must ensure that standards for primates kept in private match those required in zoos. The quality of care that these animals enjoy should be the same whether they are kept in a circus, a pet shop, a private home or a zoo. If the Committee's suggested changes prove insufficient and the evidence for doing so proves compelling, then a ban on the trade and keeping of privately kept primates should remain an option for the future. The report also calls for the Government to: ensure that legislation governing pet sales is fit for the internet age; boost public awareness of existing regulatory controls and guidance; increase the utility and efficacy of the Primate Code; expedite the publication of guidance to local authorities on the Dangerous Wild Animals Act. *authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. Did you know, every woman has a tipped uterus, and ovarian cysts are usually normal (even when they burst)? Have you ever wondered how to balance your hormones, why you have to repeat yourself at the doctor's office or why your yeast infection keeps coming back? Have you agonized about your pap smear results or worried that you may have cancer? What exactly is a pap smear anyway? In *Do You Have a Tipped Uterus: 69 Things Your Gynecologist Wishes You Knew*, board-certified obstetrics and gynecology physician, Dr. Melissa Wolf, addresses the questions most commonly asked in her gynecology office with both humor and medical expertise. She also details practical strategies for weight management, enhanced mood, improved libido, and most importantly, what to do when you encounter your gynecologist in public (hint: don't worry, she won't remember your vagina)! If you think billing routine obstetric care is always routine, you could be leaving ethical money your physician deserves on the table. For instance, you can receive increased reimbursement when your ob-gyn provides additional visits outside of the normal global ob package, but you'll have to make sure you've coded high-risk or complicated obstetrical care correctly - and that means perfecting your ICD-9 coding skills. Also, if your patient's Pap smear results return as abnormal or display insufficient cells, the ob-gyn likely will perform a repeat smear. Do you*

know how to use the proper E/M coding to get the payment you deserve? To help you overcome these specific ob-gyn challenges, check out The Coding Institute's Ob-gyn Coding Handbook 2013. You'll find great advice on mastering your biggest ob-gyn coding/billing challenges, along with tips to avoid major compliance pitfalls for ob-gyn practices.

Advancements in medical and healthcare technologies pave the way to improving treatments and diagnoses while also streamlining processes to ensure the highest quality care is given to patients. In the last few decades, revolutionary technology has radically progressed the healthcare industry by increasing life expectancy and reducing human error.

Advanced Methodologies and Technologies in Medicine and Healthcare provides emerging research on bioinformatics, medical ethics, and clinical science in modern applications and settings. While highlighting the challenges medical practitioners and healthcare professionals face when treating patients and striving to optimize their processes, the book shows how revolutionary technologies and methods are vastly improving how healthcare is implemented globally.

This book is an important resource for medical researchers, healthcare administrators, doctors, nurses, biomedical engineers, and students looking for comprehensive research on the advancements in healthcare technologies. The Feminine Monthly Tracker is a private journal for any health conscious woman! There are three years worth of monthly records that allow you to record your self-breast exam findings and important information about your monthly periods. There's also areas within this journal that allow one to record their mammogram exams and pap info. A few additional journaling pages have also been provided for your convince so you write about your feelings or thoughts. The Feminine Monthly Tracker is packed with information ranging from mammograms and what a mammogram is and how it is performed to a look at pap

smears and when you should have your first or your last one. You will learn how to preform an at home breast exam helping you detect anything that may need your doctor's attention. This journal was designed by a woman for a woman... whether you are younger or older, you will find this journal an invaluable tool in your future health. Presently, a few organizational patterns of screening against cervical cancer (CC) coexist in Russia. These include organized screening under a federal governmental program, opportunistic screening on visiting a gynecologist, obligatory annual medical checkup of working class people with inclusion of Pap-test for women and some regional programs. The organized screening under a federal governmental program was introduced in 2013. This program offers personal invitation and cervical smear every three year according to the year of birth. However, the referral of women with abnormal cytology is not under surveillance of the program. Quality of cervical cytology varies a lot in different region of Russia. In the Republic of Tatarstan liquid based cytology BD Sure Path is used. The objectives of this observational study were: (1) to evaluate shortcomings and faults of the screening chain (attendance to a primary screening, screening test performance, management of abnormal results of cervical cytology, follow up after treatment etc.) which lead to invasive CC development or late diagnosis in Russian Federation; (2) to appreciate the effectiveness and limitations of the above

mentioned organizational forms of CC screening. Methods u2013 90 consecutive patients (pts) with newly diagnosed invasive CC in the Tatarstan Cancer Center (Kazan, Russia) were carefully interviewed on their anamnesis morbi, previous screening history, history of attendance to governmental or private gynecologic care, history of their Pap-smears and other details. Medical records from primary hospitals and Pap-smear results for three years prior to the CC diagnosis were evaluated, where possible. From 90 consecutive patients with newly diagnosed invasive CC only 14 (15.5%) patients had no medical check-up with inclusion of gynecologic examination within 3 years before CC diagnosis. Within 3 years before CC diagnosis 40 (44.4%) patients attended to their gynecologist for different purposes, however cervical cancer or CIN II-III/AIS was not diagnosed. Two of these patients were scheduled for farther evaluation (1pts) or treatment (1 pts) due to abnormal cytology results but have not come to the next visit. Their doctors did not recall them. Within 3 years before CC diagnosis 41(45.5%) women attended different medical check-ups with inclusion of gynecologic examination but were not diagnosed with cervical cancer or CIN II-III/AIS. All the cytology results obtained in these patients will be analyzed and reported later. However, until the moment it is stated, that at list 22 (24.4%) women had one or more abnormal cytology results without appropriate treatment or diagnostic investigation. 16 (17.7%) cases of cervical cancer

were successfully diagnosed within the governmental program of organized screening. Data on the participation (attendance/non-attendance; cytology results) in the governmental program of organizing screening within two years before CC diagnosis were available for 66 of 90 pts. None of these 66 women had a false negative result of cervical cytology within the governmental program of organizing screening in 2 year period. However, for one woman with LSIL cytology, and one woman with HSIL cytology appropriate diagnostic investigation was not offered. Conclusions: non-attendance to CC screening is not a main cause of cervical cancer occurrence in Russia. Faults in the management of abnormal results of Pap-test are inappropriately common causes of CC development and late diagnosis. Organized screening offered by the federal governmental program is the best way of CC screening in Russia. A well organized service (within the healthcare system) aimed on managing patients with abnormal results of Pap-smear, their subsequent treatment and follow up is needed. Education in the Global City examines education in Singapore through the critical lens of 'manufacturing'. The book brings together two disparate fields which inform each other, education and the 'global city'; and the book's contributors analyse and critique the manufacturing of Singapore education and Singapore's global city formation. The collection covers vocational education, language policies, Higher Education, English education, critical

thinking, sex education, creativity, and critical feminist scholarship. Collectively, the book pries open the ideology of the manufacturing education system, and points out the tension between the nation and its ideologies, and the 'global city' aspirations. It also asks how education contributes to, and is shaped by, the market realities of Singapore's global city ambitions – which are at odds with the nationalistic local agenda and priorities of nation-building. In interrupting and speaking against the prevailing (and narrow) manufacturing of education for a teleological end, in spite of Singapore's successful nation-building, this book is an important contribution to critical education scholarship. This book was originally published as a special issue of Discourse: Studies in the Cultural Politics of Education. Background: Patients under regional anaesthesia often receive IV sedation and O₂ via nasal cannula. Over-sedation and/or airway obstruction may cause desaturation. A novel nasal PAP mask assembly was shown to maintain spontaneous ventilation and oxygenation in obese patients under sedation (Fig. 1) (1-5). We report its use in a morbidly obese OSA patient under spinal anaesthesia. Case Report: A 56 y/o female, 163 cm, 124 kg, BMI 47, with HTN, NIDDM, OSA on CPAP, asthma presented for hysteroscopy and D&C. She was anxious due to two previous anaesthesia complications. She reported a near respiratory arrest under propofol sedation for colonoscopy and required assisted mask ventilation which resulted

in inspiration pneumonitis. She also developed respiratory failure and required re-intubation after knee arthroscopy. She had severe orthopnoea and a Mallampati Class IV airway. To fit an adult nose, an infant face mask was modified by squeezing the mask for 2 minutes (Fig. 2-3). The patient gave her consent for using the modified nasal mask and taking photographs for educational purposes. Spinal anesthesia was attempted with a 25G pencil-point needle in sitting position. However, she developed a vasovagal reaction with bradycardia and lightheadedness. After her symptoms were resolved, spinal anaesthesia was performed in LLD position with a 22G cutting needle with 1.6 cc of 0.75% bupivacaine. A modified infant mask with a fully inflated air-cushion was secured over her nose with elastic head straps and connected to the anaesthesia machine via a breathing circuit. She was breathing comfortably with 8 cm H₂O nasal CPAP by adjusting the APL valve with 4 L O₂/min (Fig. 4). She maintained spontaneous ventilation and 98-100% SpO₂ throughout hysteroscopy and D&C in lithotomy position (Fig. 5). She was elated that the procedure was completed without any complication. Discussion: This modified nasal CPAP mask assembly maintained spontaneous ventilation and oxygenation in a morbidly obese patient during hysteroscopy/D&C under spinal anaesthesia. This avoids the need to intubate the patient to maintain a patent airway and post-extubation complications. References:

Learning points:!.How to modify a paediatric mask to fit the nose and construct the nasal PAP mask assembly in

Background: Patients with OSA can provide difficulties with oxygenation and ventilation after general anaesthesia (GA) induction. A nasal TSE-PAP mask assembly has been shown to maintain oxygenation by delivering nasal CPAP, BiPAP or PPV in adult patients with OSA during sedation, GA or awake/asleep endotracheal intubation (ETI)(1-5). However, it has rarely been used in paediatric patients(6-7). We used it in a paediatric patient with OSA for GA induction for laparoscopic appendectomy. Case Report: A 8-year-old, 133 cm, 42 kg, male with OSA s/p tonsillectomy and adenoidectomy (TA), presented with acute appendicitis for laparoscopic appendectomy on a Saturday. His father described some difficulty breathing at night in the patient consistent with OSA despite past TA. His father gave his consent to use a nasal mask and for taking photographs for case-report. The patient received 2 mg midazolam and was transported to the OR in a calm manner. An infant mask (#2) with fully inflated air cushion was secured over his nose with head-straps. It was connected to a breathing circuit/machine with 4 L O₂/min and 1L /min air. APL valve was adjusted to deliver 5 cm H₂O CPAP (Fig. 1). He then received 40 mg lignocaine, 50 mg propofol and 20 mg rocuronium. His mouth was closed and a tight nasal mask was obtained with one hand. Nasal ventilation was easily

accomplished. With the nasal mask delivering apnoeic oxygenation, a #2 blade video-laryngoscope was inserted which revealed a class I airway. A 6.0 ETT was inserted to 16 cm and secured (Fig. 2-3). His SpO₂ remained 100% throughout. He tolerated the procedure well. Immediately post-extubation, he received the same nasal mask with 5 cm H₂O CPAP. A bag-valve device was used to deliver nasal CPAP during a long transport from the 1st floor OR to the 7th floor paediatric PACU without incident. Discussion: This simple nasal TSE-PAP mask assembly was used to provide continuous active oxygenation in a paediatric patient with OSA during GA induction. Besides CPAP pre-oxygenation, it provided means to deliver assisted nasal ventilation, apnoeic oxygenation during VL ETI and CPAP during long but safe transport to paediatric PACU. It may improve patient safety at a low cost. Ref: 1.

SPA-AAP, 2016 Learning Points: How to prepare a nasal mask assembly and to provide nasal CPAP in paediatric patients and assisted nasal ventilation in patients with OSA. The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with

basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem. Human Papilloma Virus - HPV - is a sexually transmitted disease that is known as 'the silent killer' because its symptoms are so ambiguous most people don't know they have it. This book will raise awareness of this disease, as well as other abnormal smear tests, and provide much needed information and support. Cervical Intraepithelial Neoplasia: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Diagnosis and Screening in a concise format. The editors have built Cervical Intraepithelial Neoplasia: New Insights for the Healthcare Professional: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Diagnosis and Screening in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Cervical Intraepithelial Neoplasia: New Insights for the Healthcare Professional: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available

exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. Experience the life of doctors and patients. Discover remedies for various conditions; how to lower your medical bills, and secure quality health care.

If you ally need such a referred Acog Guidelines For Pap 2013 books that will give you worth, get the definitely best seller from us currently from several preferred authors. If you desire to witty books, lots of novels, tale, jokes, and more fictions collections are along with launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all ebook collections Acog Guidelines For Pap 2013 that we will categorically offer. It is not around the costs. Its about what you habit currently. This Acog Guidelines For Pap 2013, as one of the most on the go sellers here will entirely be in the midst of the best options to review.

Getting the books Acog Guidelines For Pap 2013 now is not type of inspiring means. You could not lonely going later book gathering or library or borrowing from your associates to get into them. This is an no question easy means to specifically acquire lead by on-line. This online publication Acog Guidelines For Pap 2013 can be one of the options to

accompany you behind having supplementary time.

It will not waste your time. agree to me, the e-book will definitely save you extra time to read. Just invest tiny times to right to use this on-line notice Acog Guidelines For Pap 2013 as without difficulty as evaluation them wherever you are now.

Right here, we have countless books Acog Guidelines For Pap 2013 and collections to check out. We additionally provide variant types and then type of the books to browse. The all right book, fiction, history, novel, scientific research, as without difficulty as various supplementary sorts of books are readily open here.

As this Acog Guidelines For Pap 2013, it ends going on instinctive one of the favored book Acog Guidelines For Pap 2013 collections that we have. This is why you remain in the best website to look the unbelievable books to have.

Thank you very much for reading Acog Guidelines For Pap 2013. Maybe you have knowledge that, people have look numerous times for their chosen readings like this Acog Guidelines For Pap 2013, but end up in malicious downloads.

Rather than enjoying a good book with a cup of coffee in the afternoon, instead they cope with some harmful virus inside

their laptop.

Acog Guidelines For Pap 2013 is available in our book collection an online access to it is set as public so you can get it instantly.

Our books collection spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one.
