Malicroix Oct 23 2020 Fans of the style of William Faulkner will want to read Henri Bosco, four-time nominee for the Nobel Prize in Literature. Available in English for the first time, Malicroix tells the story of a recluse living in the French countryside, unraveling how he came to a life of solitude. Henri Bosco, like his contemporary Jean Giono, is one of the regional masters of modern French literature, a writer who dwells above all on the grandeur, beauty, and ferocious unpredictability of the natural world. Malicroix, set in the early nineteenth century, is widely considered to be Bosco's greatest book. Here he invests a classic coming-of-age story with a wild, mythic glamour. A nice young man, of stolidly unimaginative, good bourgeois stock, is surprised to inherit a house on an island in the Rhône, in the famously desolate and untamed region of the Camargue. The terms of his great-uncle's will are even more surprising: the young man must take up solitary residence in the house for a full three months before he will be permitted to take possession of it. With only a taciturn shepherd and his dog for occasional company, he finds himself surrounded by the huge and turbulent river (always threatening to flood the island and surrounding countryside) and the wind, battering at his all-too-fragile house, shrieking from on high. And there is another condition of the will, a challenging task he must perform, even as others scheme to make his house their own. Only under threat can the young man come to terms with both his strange inheritance and himself.

Unveiling the Prada Foundation Jun 30 2021 The Prada foundation's new Art Centre and permanent Exhibition Space is situated in a location that includes buildings dating from 1910s belonging to one of the first Milanese spirits manufacturing companies. Preserved in their original conditions, the seven buildings including warehouse, laboratories, brewing silos and workers' residences surround a large courtyard. OMA/Rem Koolhaas's project adds an exhibition building, an auditorium and a tower to the existing structure to house selections of works from the collection. This project is a unique approach to the idea of the co-existence of contemporary architecture with the regeneration of an historic area, representing the evolution of the industrial development of Milan that continues to the present day.

Beyond the Box Mar 16 2020 « Beyond the box : diverging curatorial practices is a collection of essays by leading canadian and international curators

and artists that explores regions of art outside the gallery or museum. Delving into four main topics : publications, biennials, art museums today, and new media. The book documents contemporary curatorial work beyond the boundaries of traditional curatorial practice. »--

Tetrascroll Jan 26 2021 A series of twenty-one original triangular lithographs (with narrative captions) which may be displayed in a helical scroll of linked tetrahedra. They were executed during the years 1975 and 1976 under the guiding light of Tatyana Grosman (to whom Fuller had been introduced by Edwin Schlossberg) at her ULAE print workshop in West Islip, Long Island. In something of a publishing innovation this trade book was brought out concurrently with a limited edition of the signed original lithographs. Michael Denny was the editorial impresario at St. Martin's and Ronald Feldman Fine Arts handled the exhibition of the lithographs. Fuller composed the Tetrascroll between the publication of Synergetics in 1975 and Synergetics 2 in 1979. He had been frustrated by the rigid structure of the synergetics books which, despite certain advantages, he felt robbed the work of spontaneity and narrative force. To compensate for this Fuller worked feverishly on the Tetrascroll as a free-form obligato to the synergetics books. He explained to me at the time, "The empirical, the scientific way to present the argument of synergetics is the way I am doing it in Goldilocks. Description by Ed Applewhite, courtesy of The Estate of Buckminster Fuller

From Post-Industrial to Post-Modern Society Dec 13 2019 This lucid and insightful study of a crucial area of current debate covers the three theories of contemporary change: the information society, post-Fordism and postmodernity.

Diener & Diener Jul 20 2020

Great Leap Forward Jan 06 2022 Harvard Design School's Project on the City is a graduate thesis program that examines the effects of modernization on the urban condition. Each year the Project on the City studies a specific region or phenomena, & develops a conceptual framework & vocabulary for urban environments that can not be described within the traditional categories of architecture, landscape, or urbanism. In order to understand new forms of urbanization, thesis advisor Rem Koolhaas & students from the fields of architecture, landscape, & urbanism, document & analyze areas of study through a combination of field research, statistical analysis, historical developments, & anecdotal situations. The result of each project is an intensive, specialized study of the effects of modernization on the contemporary city. During the 1996-1997 period, Harvard's graduate students studied China's Pearl River Delta (PRD), a cluster of five cities with a population of twelve million destined to reach thirty-six million by the year 2020. The establishment in the PRD of Special Economic Zones--"laboratories for the contained unleashing of capitalism"--hastened an unprecedented experiment in urbanization on an astonishingly large scale. Great Leap Forward contains essays which explore, in a theoretical & statistical context, the results of this rapid modernization that has produced an entirely new urban substance.

Al Manakh Jun 11 2022

MVRDV Buildings Feb 13 2020 In cooperation with Ilka and Andreas Ruby, book architectural MVRDV assembled a redefined architecture monograph about its realized work, featuring testimonies, journalistic articles, unpublished images and accessible drawings. The architects of MVRDV are famous for their visionary research and thought provoking projects such as Pig City and Grand Paris. In 20 years of practice the office also realized a big portfolio of buildings and urban plans, including Villa VPRO, Balancing Barn and Mirador Madrid. book architectural.

Towards Universality Jan 14 2020 There is no shortage of books about Le Corbusier, or Mies van der Rohe, or De Stijl. However, this book considers them in relation to each other, observing how a study of one can illuminate the works of the others. Going beyond a superficial look at the end-products of these architects, this book examines the philosophical foundations of their work, taking as its central theme the aim of universality, as opposed to the individual and the particular. Each of these three aimed at universality, but for each this concept took on a different form. The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself: it was boundless, going beyond the limits of

the canvas and seeking to abolish the wall as the boundary between interior and exterior space. In contrast, each of Le Corbusier's creations was a self-contained universe within a clear frame, while Mies fluctuated between these two perspectives.

The History of Stainless Steel May 18 2020 The History of Stainless Steel provides a fascinating glimpse into a vital material that we may take for granted today. Stainless steel, called "the miracle metal" and "the crowning achievement of metallurgy" by the prominent metallurgist Carl Zapffe, is a material marvel with an equally fascinating history of people, places, and technology. As stainless steel nears the hundredth anniversary of its discovery, The History of Stainless Steel by Harold Cobb is a fitting perspective on a vital material of our modern life. Aptly called the miracle metal by the renowned metallurgist Carl Zapffe, stainless steel is not only a metallurgical marvel, but its history provides an equally fascinating story of curiosity, competitive persistence, and entrepreneurial spirit. The History of Stainless Steel is the world's first book that captures the unfolding excitement and innovations of stainless steel pioneers and entrepreneurs. Many new insights are given into the work of famous pioneers like Harry Brearley, Elwood Haynes, and Benno Strauss, including significant technical contributions of lesser known figures like William Krivsky. This fascinating history of stainless steel exemplifies the great push of progress in the 20th Century. From the stainless steel cutlery of Brearley in 1913, stainless steel burst on the modern scene in many tangible ways. Excerpted text by William Van Alen, architect of the Chrysler Building, describes the early architectural use of stainless steel. Another historic application of stainless steel is the revolution in rail travel by the Edward G. Budd Company, which built the first light-weight stainless steel passenger trains--with an astounding 90% reduction in fuel costs. This remains recognized today as one of the technological marvels of the modern world. Harold Cobb, a metallurgist who has spent much of his career in the stainless steel industry, uncovers many interesting stories and insights, including a special perspective on the prominent role of stainless steel in the activities of emerging technical societies such as the American Society for Metals and the American Society for Testing and Materials. Amply illustrated and with a 78-page timeline, this publication truly evokes the inspirations created by and from stainless steel.

Junkspace with Running Room Aug 13 2022 Junkspace first appeared in the Harvard Design School Guide to Shopping (2001), a vast compendium of text, images, and data concerning the consumerist transformation of city and suburb from the first department store to the latest mega mall. The architect Rem Koolhaas itemized in delirious detail how our cities are being overwhelmed. His celebrated jeremiad is updated here and twinned with Running Room, a fresh response from the cultural critic Hal Foster. Junkspace describes the bleak and featureless world of capitalism, while Running Room seeks to find a space within the junk in which the individual might still exist.

OMA/Rem Koolhaas Oct 15 2022 4e de couv. : "The activities of Rem Koolhaas and his numerous collaborators have been widely discussed, even before the foundation of the Office for Metropolitan Architecture in 1975. The work of OMA, including Koolhaas's written oeuvre, is at the root of an important part of the Western discourse on architecture from the past half century. The book compiles about 150 texts - interviews, essays, articles, reviews, letters, introductions, polemics, appraisals, and competition reports - that in many cases have been translated for the first time. As a reader covering the work of OMA/Rem Koolhaas from Delirious New York to S, M, L, XL, it provides a fresh and critical view on one of the most complex architectural oeuvres of recent times. At the same time, the book presents an account of the debates on architecture and the city that remain significant today."

Mondrian Nov 11 2019 Piet Mondrian was one of the great pioneers of abstract art. This book looks at the relationship between his paintings and his theories on art.

Serpentine Gallery Feb 07 2022 Every year the Serpentine Gallery, located in the heart of Hyde Park in central London, invites an internationally renowned architect or designer to design for them a temporary pavilion in their grounds for the summer. To coincide with the opening of the

Serpentine Gallery Pavilion 2007 by Olafur Eliasson and Kjetil Thorsen, the Serpentine Gallery and Trolley Books are pleased to announce the launch of the publication of Serpentine Gallery 24-hour Marathon: London. Small and with a soft-cover in the format of a traditional 'flipbook', the book is a lively representation of last year's now legendary 24-hour marathon of interviews, held with some of the greatest names in international contemporary culture, as part of the programme of the Serpentine Gallery Pavilion 2006. The interviews were hosted by the architect of the Pavilion, Rem Koolhaas, and the Serpentine Gallery's Co-director of Exhibitions and Programmes, Hans Ulrich Obrist. The 24-hour, non-stop interview event featured over 60 world-renowned artists, architects, writers, designers and theorists, among them David Adjaye, Damien Hirst, Gilbert and George, Hussein Chalayan and Doris Lessing, as well as the Director of the Serpentine Gallery, Julia Peyton-Jones. From 6 pm on Friday 28th June 2006 until 6pm on Saturday 29th, Koolhaas' Pavilion welcomed the public to join them in this landmark event, with many people staying for the entire duration. This 'flip-book' was conceived as a way of responding creatively to the marathon by producing a publication that was deliberately playful and tactile, giving a sense of speed, excitement and spontaneity of the Interview Marathon event. A highly visual and energetic book for its small size, it features over 150 colour and black and white illustrations and photographs interspersed with bite-sized text extracts from the interviews, and moves along in chronological order of the 24 hours. An introduction by Julia Peyton-Jones talks of the history of the Serpe

Elements of Architecture Mar 28 2021 "Une mine d'or à parcourir encore et toujours, un de ces livres qui fournira aux bâtisseurs actuels et futurs de notre monde tout le savoir dont ils ont besoin pour aborder les questions actuelles et celles auxquelles ils seront confrontés". ArchDaily Architecture is a compelling mixture of stability and flux. In its solid forms, time and space collide, amalgamating distant influences, elements that have been around for over 5, 000 years and others that were (re-)invented yesterday. Elements of Architecture focuses on the fragments of the rich and complex architectural collage. Window, facade, balcony, corridor, fireplace, stair, escalator, elevator : The book seeks to excavate the micro-narratives of building detail. The result is no single history, but rather the web of origins, contaminations, similarities, and differences in architectural evolution, including the influence of technological advances, climactic adaptation, political calculation, economic contexts, regulatory requirements, and new digital regimes. Derived from Koolhaas' exhaustive and much-lauded exhibition at the 2014 Venice Architecture Biennale, this is an essential toolkit to understanding the pieces, parts, and fundamentals that comprise structure around the globe. Designed by Irma Boom, the book contains essays from Rem Koolhaas, Stephan Trueby, Manfredo di Robilant, and Jeffrey Inaba; interviews with Werner Sobek and Tony Fadell (of Nest); and an exclusive photo essay by Wolfgang Tillmans.

Dalí Sep 21 2020 Salvador Dalí turned the Empordà landscape into a symbol of surrealism. The Catalan painter's work is inseparable from his birthplace. The best evidence of this we have in the Dalí Theatre-Museum in Figueres, the house in Portlligat and the castle in Púbol. Three sides of the triangle in which a large part of the brilliant artist's daily life took place.

Color for Architects (Architecture Brief) Jun 18 2020 As far back as the earliest Greek temples, color has been an integral part of architecture but also one of its least understood elements. Color theory is rarely taught in architecture schools, leaving architects to puzzle out the hows and whys of which colors to select and how they interact, complement, or clash. Color for Architects is profusely illustrated and provides a clear, concise primer on color for designers of every kind. This latest volume in our Architecture Briefs series combines the theoretical and practical, providing the basics on which to build a fuller mastery of this essential component of design. A wealth of built examples, exercises, and activities allows students to apply their learning of color to real-world situations.

Non-referential Architecture Aug 01 2021 Non-Referential Architecture is a manifesto on a new kind of architecture. Non-Referential Architecture presents a new framework for architecture in a world that is increasingly free of ideologies. We have left behind the values of multicultural

postmodernity! Non-Referential Architecture offers unlimited possibilities for the liberated mind.

Six Canonical Projects by Rem Koolhaas Dec 17 2022 Rem Koolhaas (born in 1944) has been part of the international architecture avant-garde since the nineteen-seventies. His numerous worldwide awards include the Pritzker Prize in 2000 for his lifetime achievement. This book interprets his many buildings and projects for the first time through his own comprehensive theoretical oeuvre, comprising polemics manifestos, books about cultural studies such as *Delirious New York*, and so-called "design patents". Rem Koolhaas developed an evolutionary design method that linked theory and practice, whereby an idea is applied to several projects and combined with others in different ways, so that it is continuously evolving. The book not only combines this architectural knowledge with the intellectual history of the concepts, but also reinterprets the function of the authors or the architects and their originality.

Content Mar 08 2022 In its mood and subject matter, Content reflects recent shifts in geo-politics, particularly since 9-11. The book's content follows Koolhaas's expanding interests, mixing architecture with politics, history, technology, and sociology. Topics are arranged according to geography.

Preservation is Overtaking Us May 10 2022 *Preservation is Overtaking Us* brings together two lectures given by Rem Koolhaas at Columbia University's Graduate School of Architecture, Planning and Preservation, along with a response (framed as a supplement to the original lectures) by Jorge Otero-Pailos. In the first essay Koolhaas describes alternative strategies for preserving Beijing, China. The second talk marks the inaugural Paul Spencer Byard lecture, named in celebration of the longtime professor of Historic Preservation at GSAPP. These two lectures trace key moments of Koolhaas' thinking on preservation, including his practice's entry into China and the commission to redevelop the State Hermitage Museum in St. Petersburg, Russia. In a format well known to Koolhaas' readers, Otero-Pailos reworks the lectures into a working manifesto, using it to interrogate OMA's work from within the discipline of preservation.

The Image and the Region--making Mega-city Regions Visible! Apr 16 2020 Mega-city regions are currently a frequent topic of discussion. Researchers are exploring the fundamentals for understanding the role of metropolitan regions and their social, economic, and cultural developments on a national and European basis. The responsible decision makers in politics and business are calling for new measures for greater urban areas. But that is just the start of the problem: Europe seems to lack an awareness for metropolitan regions. For the majority of politicians, planners, institutions, and residents the features of mega-city regions remain invisible. They are scarcely charted; there are no concepts for representing them or any direct sensory understanding of them in everyday life. The book is based on the understanding that the visual depiction of mega-city regions is fundamental to identifying, acting, and developing within existing concentrations of urban populations. Through essays from various disciplines the book approaches the phenomenon and discusses the necessity to visualize mega-city regions. 203 illustrations

Museum Memories Aug 21 2020 The author shows how museum culture offers a unique vantage point on the 19th and 20th centuries' preoccupation with history and subjectivity, and demonstrates how the constitution of the aesthetic provides insight into the realms of technology, industrial culture, architecture, and ethics.

Rem Koolhaas Feb 19 2023

Ábalos & Herreros : grand tour ; Centro Atlántico de Arte Moderno, CAAM. Las Palmas de Gran Canaria del 24 de mayo al 10 de julio de 2005 ; Fundación ICO. Madrid del 14 de septiembre al 27 de noviembre de 2005 Apr 09 2022

Rem Koolhaas y el surrealismo. Arquitectura convulsiva Jan 18 2023 Este libro propone un acercamiento a la obra de Rem Koolhaas y su Office for Metropolitan Architecture desde la hipótesis de la existencia de una conexión intelectual intensa con el surrealismo que se manifiesta firmemente desde las primeras ideas y fases de concepción de proyecto, en ciertas metodologías de desarrollo de las propuestas, e incluso en la materialización

constructiva del propio edificio. ¿Es Rem Koolhaas un arquitecto surrealista? Tal afirmación nos resulta confusa si nos afanamos en buscar en su obra signos del onirismo exacerbado que terminó convirtiéndose en lo más representativo de la vanguardia parisina. "Exijo la ocultación profunda y verdadera del surrealismo" exclamaría André Breton en 1929 apelando a la importancia del compromiso revolucionario frente a otras consideraciones como la estética. En este sentido, el surrealismo que empapa la obra de Rem Koolhaas, es heredero fiel de estas palabras: pertenece al ámbito del proceso frente al de la forma. Se encuentra oculto, pero manteniendo importantes conexiones con los tres campos del conocimiento que el surrealismo tomó del psicoanálisis y que sirven para organizar el libro en tres partes: El automatismo psíquico, los sueños y la locura. Javier Arias plantea colocar en una mesa de disección el trabajo de OMA / Rem Koolhaas buscando vínculos no sólo con el surrealismo como el movimiento de vanguardia, sino con otras corrientes de pensamiento y de creación artística del siglo XX a las que influyó notablemente y que comparten su principio básico: el entendimiento de la realidad como una unidad superior de la que solo percibimos una parte reprimida por la razón y por tanto la reivindicación de lo irracional: la imaginación, la fantasía y el delirio.

Countryside Dec 05 2021 From animals to robotization, climate change to migration, Rem Koolhaas presents a new collaborative project exploring how countryside everywhere is transforming beyond recognition. The pocketbook gathers in-depth essays spanning from Fukushima to the Netherlands, Siberia to Uganda - an urgent dispatch from this long-neglected realm, revealing its radical potential for changing everything about how we live

Beyond Urbanism Oct 11 2019 This book investigates the spatial implications of the Innovation Economy. The reflections and materials presented in the following pages build upon considerations that stemmed from the design workshop "Innovative Regions and Creative Cities" organized in

Inside Outside Apr 28 2021 Petra Blaisse and her firm, Inside Outside, specialize in the rare combination of interior and landscape design, interweaving architecture and context. Interior projects use materials that introduce visual effects such as color, flexibility, seasonal change, and movement and solve acoustic, climatic, shading, and spatial issues. Landscape projects reflect a fascination with materials, light, and movement within an urban and infrastructural program. This approach brings forth a series of strong, multilayered garden and park designs that combine logistics with rich planting schemes and graphic effects. Inside Outside introduces the full range of Blaisse's work, focusing on collaborations with internationally renowned architects including Rem Koolhaas and SANAA. It weaves together descriptions and documentation of more than fifty projects, a conversation with the designer, and essays by renowned writers and critics.

Smart Landscape Nov 04 2021 Le energie rinnovabili hanno un ruolo importante nei mutevoli paesaggi di oggi. Questa ricerca analizza la transizione all'energia sostenibile in corso oggi dal punto di vista dell'architettura paesaggistica.

On Farming Feb 24 2021 'On Farming' reveals the interdependencies of our globalized world, as today information, energy, labour, and landscape, among others, can be farmed.

Catalogue, Foster + Partners May 30 2021 "Highlighting recent projects, Norman Foster: Catalogue traces the development of the Foster studio from its formation in the 1960s to the present. More than 120 buildings and projects are featured in stunning full-color photographs and complemented by architectural sketches and drawings. The book examines the distinctive features of Foster's work and shows the full range of the practice's achievements as urban planners, architects, and industrial designers." "Including numerous current works, unbuilt projects such as Foster's design for the World Trade Center competition, as well as buildings that showcase the essential characteristics of Foster's distinctive design philosophy, this book presents the most comprehensive overview of the renowned architect's career to date." --Book Jacket.

S, M, L, XL Sep 14 2022 S,M,L,XL presents a selection of the remarkable visionary design work produced by the Dutch firm Office for Metropolitan

Architecture (O.M.A.) and its acclaimed founder, Rem Koolhaas, in its first twenty years, along with a variety of insightful, often poetic writings. The inventive collaboration between Koolhaas and designer Bruce Mau is a graphic overture that weaves together architectural projects, photos and sketches, diary excerpts, personal travelogues, fairy tales, and fables, as well as critical essays on contemporary architecture and society. The book's title is also its framework: projects and essays are arranged according to scale. While Small and Medium address issues ranging from the domestic to the public, Large focuses on what Koolhaas calls "the architecture of Bigness." Extra-Large features projects at the urban scale, along with the important essay "What Ever Happened to Urbanism?" and other studies of the contemporary city. Running throughout the book is a "dictionary" of an adventurous new Koolhaasian language -- definitions, commentaries, and quotes from hundreds of literary, cultural, artistic, and architectural sources.

Project Japan Sep 02 2021 Metabolism was a movement launched in Japan that took inspiration for buildings and cities from biological systems. With interviews and commentary and hundreds of images, Project Japan unearths a history that casts new light on the key issues that both enervate and motivate architecture today.

Cities of the 21st Century Nov 23 2020

Rem Koolhaas/OMA Oct 03 2021 This first critical monograph places the work of Rem Koolhaas and OMA in a cultural context that allows the reader to better understand the creative process of modern architecture, retracing the career of Rem Koolhaas in chronological and thematic order.

Funda Men Tals Nov 16 2022 The official Biennale catalogue—a global overview of architecture of the last one hundred years. The emphasis of the 2014 Biennale is on architectural history. Each country is asked to narrate its history over the last one hundred years in relation to the idea of modernity. Has national identity been sacrificed on the altar of modernity? This is the issue that the Biennale is called on to address.

The Gulf Dec 25 2020 This accordion-fold booklet contains a series of analytical views of the Arabian coast of the Persian Gulf by AMO-OMA and colleagues from the American University of Sharjah, UAE. In a "futurized present," these views seek to depict the current and unprecedented state of the region, which invites one to contemplate the design of a new version of urbanism. Like a pristine and untouched canvas, the sand and sea of the Persian Gulf coast constitute a tabula rasa, waiting to receive the imprint of new identities. The West is guilty of a double negligence vis-à-vis this land of possibilities "something that actually has its origins in the West is not being taken seriously, and as a result we are unable to seize upon a burgeoning global phenomenon. This accordion-fold booklet is published to coincide with the 10th International Architecture Exhibition of the Venice Biennale.

Four Walls and a Roof Jul 12 2022 Architects, we like to believe, shape the world as they please. Reinier de Graaf draws on his own tragicomic experiences to present a candid account of what it is really like to work as an architect. To achieve anything, he notes, architects must serve the powers they strive to critique, finding themselves in a perpetual conflict of interest.
