AIDS and Development in Africa demonstrates the human consequences of AIDS and the efforts being made by governments, individuals, families, villages, communities, and non-governmental organizations to respond to the pandemic. You will read beyond the usual analysis of demographics and receive much more substantial assessments and analyses of the burden on people, economies, and health care systems of the African countries. In The Empress Is a Man: Stories from the Life of Jose Sarria, Michael Gorman exposes Sarria's life in a frank manner and with a unique storytelling ability that simultaneously causes amusement and sadness. You'll find The Empress Is a Man fascinating as you read about the life of this truly courageous, outrageous, and remarkable man. McGinley uses the autobiographies of Gay men to explore the overlap between their religious and sexual identities. > Twenty-one mostly non-academic contributors explore sex in public--performed, depicted, or discussed outside "appropriate" bedrooms and doctor's offices. Annie Sprinkle is interviewed as a "metamorphosexual," Sally Trash writes on porn videos' effect on

lesbians, Lawrence Schimel offers "Pumping Iron, Pumping Cocks: Sex at the Gym," and T.A. King writes on masochism. One of the more interesting articles concerns the "backsplash" over an advertising campaign conducted on urinal screens printed with the following affirmation: "You hold the power to stop rape in your hand." Annotation copyrighted by Book News, Inc., Portland, OR. "Compelling, timely, and provocative. The writing is sleek and exhilarating. It doesn't waste time telling us what it will do or what it has just done—it just does it." — Don Kulick, Professor of Anthropology, New York University

How we can talk about sex and risk in the age of barebacking— or condomless sex— without invoking the usual bogus and punitive clichés about gay men's alleged low self-esteem, lack of self-control, and other psychological "deficits"? Are there queer alternatives to psychology for thinking about the inner life of homosexuality? *What Do Gay Men Want?* explores some of the possibilities. Unlike most writers on the topic of gay men and risky sex, David Halperin liberates gay male subjectivity from psychology, demonstrating the insidious ways in which psychology's defining opposition between the normal and the pathological subjects homosexuality to medical reasoning and revives a whole set of unexamined moral assumptions about "good" sex and "bad" sex. In particular, Halperin champions neglected traditions of queer thought, including both literary and popular discourses, by drawing on the work of well-known figures like Jean Genet and neglected ones like Marcel Jouhandeau. He shows how the long history of gay men's uses of "abjection" can offer an alternative, nonmoralistic model for thinking about gay male subjectivity, something which is urgently needed in the age of barebacking. Anyone searching for nondisciplinary ways to slow the spread of HIV/AIDS among gay men— or interested in new modes of thinking about gay male subjectivity— should read this book. David M. Halperin is W. H. Auden Collegiate Professor of the History and Theory of Sexuality, Professor of English, Professor of Women's Studies, Professor of Comparative Literature, and Adjunct Professor of Classical Studies at the University of Michigan. The author, drawing on his years of experience as a gay psychotherapist and advice columnist (AskAngelo.com), offers practical and thoughtful relationship strategies, as well as insight into such issues as coming out, dating, avoiding players, and maintaining a satisfying sex life. Original. Contributors from Europe and North America challenge the dominant paradigms of HIV prevention and explore models and theories to help professionals develop more effective prevention

programs. They consider such factors as improving successful risk management strategies rather than quantifying risk factors; examining the meaning and context of sexual acts that occur in casual encounters and steady partnerships and their relevance to prevention; harm reduction rather than expecting abstinence; and relating such aspects of sexual encounters as physical attraction, intimacy, reciprocity, and power to why men choose not to use condoms. Paper edition (1-56023-116-5), \$22.95. Also published as *Journal of Psychology and Human Sexuality* vol. 10, nos. 3/4 (1998). Annotation copyrighted by Book News, Inc., Portland, OR

Finalist for 2010 LGBT Anthology Award from the Lambda Literary Awards

Unwed teen mothers, abortion, masturbation, pornography, gay marriage, sex trafficking, homosexuality, and HIV are just a few in a long line of issues that have erupted into panics. These sexual panics spark moral crusades and campaigns, defining and shaping how we think about sexual and reproductive rights. The essays in *Moral Panics, Sex Panics* focus on case studies ranging from sex education to AIDS to race and the "down low," to illustrate how sexuality is at the heart of many political controversies. The contributors also reveal how moral and sexual panics have become a mainstay of certain kinds of conservative efforts to win elections and gain power in moral, social, and political arenas. *Moral Panics, Sex Panics* provides new and important insights into the role that key moral panics have played in social processes, arguing forcefully against the political abuse of sex panics and for the need to defend full sexual and reproductive rights. Contributors: Cathy J. Cohen, Diane DiMauro, Gary W. Dowsett, Janice M. Irvine, Carole Joffe, and Saskia Eleonora Wieringa. Filling in some perceived gaps in queer studies. Fourteen essays center the analysis of lesbian and gay sexuality on sex itself and real bodies, acts, and desires; and explore the relationships between male and female homosexuality. The titles include *Blackbeard Lost*; *The Ick Factor--Flesh, Fluids, and Cross- Gender Revulsion*; *Recognizing the Real--Labor and the Economy of Banjee Desire*; and *Los Angeles at Night*. Annotation copyrighted by Book News, Inc., Portland, OR

This book analyses the impact of HIV and AIDS on performance in the twenty-first century from an international perspective. It marks a necessary reaffirmation of the productive power of performance to respond to a public and political health crisis and act as a mode of resistance to cultural amnesia, discrimination and stigmatisation. It sets out a number of challenges and contexts for HIV and AIDS performance in the twenty-first century, including: the financial interests of the pharmaceutical industry;

the unequal access to treatment and prevention technologies in the Global North and Global South; the problematic division between dominant (white, gay, urban, cis-male) and marginalised narratives of HIV; the tension between a damaging cultural amnesia and a potentially equally damaging partner 'AIDS nostalgia'; the criminalisation of HIV non-disclosure; and, sustaining and sustained by all of these, the ongoing stigmatisation of people living with HIV. This collection presents work from a vast range of contexts, grouped around four main areas: women's voices and experiences; generations, memories and temporalities; inter/national narratives; and artistic and personal reflections and interventions.

Two men, who have every reason in the world to run from what they're feeling, find they cannot deny themselves a chance at a love like this. Lincoln McCaw lost everything after he caused a fatal accident. A year later, he's drowning the guilt and despair in whiskey, but he needs to move on. His sister and her kids are counting on him. Then he meets a man who ignites a passion Lincoln thought he'd never find. Too bad one night is all they can have together. Now he needs to figure out how to turn away from the only person who makes him feel alive before whoever is sending him threats decides Lincoln needs to suffer more than he already has. Jay Miller is surrounded by grief and misery until he finally gives in to all those years of sexual fantasies about being with another guy. Realizing he's ended up in the arms of the man who caused his wife's accident, he tries to pull away. But how can he give up a friendship he needs more than anything—a friendship and a love that could save him? He may not have time to make the choice before someone else destroys it all. Length: 101,781 words. This book contains explicit sexual content and graphic language.

Dry Bones Breathe: Gay Men Creating Post-AIDS Identities and Cultures breaks new ground in offering an original and insightful interpretation of gay men's shifting experience of the AIDS epidemic. From **Dry Bones Breathe**, you'll gain a deeper understanding of current community debates focused on circuit parties, unprotected sex, and gay men's sexual cultures, and you will learn how social, political, and biomedical changes are dramatically transforming gay identities and cultures. **Dry Bones Breathe** is Eric Rofes' explosive follow-up to **Reviving the Tribe**, a book which broke open debates in gay communities around the world about sex, identity, and gay men's relationship to AIDS. In this volume, Rofes contends that most gay men no longer experience AIDS as the crisis they did during the 1980s. Gay men often attribute this shift to the advent of protozoa inhibitors, but Rofes explains how other factors, including the epidemic's predicted trajectory,

new treatments for opportunistic infections, the passage of time, and the increasing diversity of gay men inhabiting communities throughout the country have set in motion the transformation of gay life. AIDS organizations and gay leaders, however, continue to assert that gay men experience AIDS as an emergency, resulting in a tremendous dissonance between gay leaders and their communities. In the midst of this controversy, *Dry Bones Breathe* lets you share in stories of hope and recovery and a new vision for AIDS work that demands a radical redesign of prevention, care, and activism. *Dry Bones Breathe* tackles several other issues concerning the powerful shifts occurring in gay communities and cultures by: explaining why an understanding of the terms “post-AIDS” and “post-crisis” is crucial to interpreting contemporary gay male cultures and what Australian prevention theorists have to offer gay men in the United States describing the “Protozoa Moment” and exploring how a dangerous obsession with pharmaceuticals is leading many to mistakenly attribute all changes in gay men’s cultures to combination therapies examining the writings of Larry Kramer, Andrew Sullivan, Michelangelo Signorile, and Gabriel Rightly to illustrate how the crisis construct has unleashed a backlash against gay sexual cultures discussing the dramatic diminution in gay men’s AIDS-related deaths in epicenter cities and the impact of shrinking obituary pages on gay men’s mental health exploring the diverse relationships to the epidemic forged by young gay men, gay men of color, gay men from rural or small towns, and middle-aged men not infected with HI detailing how HI prevention and service organizations targeting gay men must redesign their mission and restructure their work In response to continuing efforts to direct gay men back into a state of emergency, *Dry Bones Breathe* suggests that long-term prevention efforts must be constructed around something other than a crisis. While AIDS organizations look at gay men’s diminished participation in AIDS activism, Rofes argues that these organizations should face how they have distanced themselves from the reality of most gay men’s lives. From stories and experiences full of hope, anger, sadness, and strength, *Dry Bones Breathe* will teach you about gay men who no longer base their identities and cultures solely around AIDS. In *Gothic Queer Culture*, Laura Westengard proposes that contemporary U.S. queer culture is gothic at its core. Using interdisciplinary cultural studies to examine the gothicism in queer art, literature, and thought—including ghosts embedded in queer theory, shadowy crypts in lesbian pulp fiction, monstrosity and cannibalism in AIDS poetry, and sadomasochism in queer

performance--Westengard argues that during the twentieth and twenty-first centuries a queer culture has emerged that challenges and responds to traumatic marginalization by creating a distinctly gothic aesthetic. Gothic Queer Culture examines the material effects of marginalization, exclusion, and violence and explains why discourse around the complexities of genders and sexualities repeatedly returns to the gothic. Westengard places this queer knowledge production within a larger framework of gothic queer culture, which inherently includes theoretical texts, art, literature, performance, and popular culture. By analyzing queer knowledge production alongside other forms of queer culture, Gothic Queer Culture enters into the most current conversations on the state of gender and sexuality, especially debates surrounding negativity, anti-relationalism, assimilation, and neoliberalism. It provides a framework for understanding these debates in the context of a distinctly gothic cultural mode that acknowledges violence and insidious trauma, depathologizes the association between trauma and queerness, and offers a rich counterhegemonic cultural aesthetic through the circulation of gothic tropes. A People magazine Best Book of Fall 2019 An Amazon Best Young Adult Book of 2019 "F***ing outstanding."--Roxane Gay, New York Times bestselling author Juliet Milagros Palante is a self-proclaimed closeted Puerto Rican baby dyke from the Bronx. Only, she's not so closeted anymore. Not after coming out to her family the night before flying to Portland, Oregon, to intern with her favorite feminist writer--what's sure to be a life-changing experience. And when Juliet's coming out crashes and burns, she's not sure her mom will ever speak to her again. But Juliet has a plan--sort of. Her internship with legendary author Harlowe Brisbane, the ultimate authority on feminism, women's bodies, and other gay-sounding stuff, is sure to help her figure out this whole "Puerto Rican lesbian" thing. Except Harlowe's white. And not from the Bronx. And she definitely doesn't have all the answers . . . In a summer bursting with queer brown dance parties, a sexy fling with a motorcycling librarian, and intense explorations of race and identity, Juliet learns what it means to come out--to the world, to her family, to herself. Following the development of anti-retroviral therapies (ARVs), many people affected by HIV in the 1980s and 1990s have now been living with the condition for decades. Drawing on perspectives from leading scholars in Bangladesh, Canada, Hong Kong, New Zealand, Switzerland, Ukraine, the UK and the US, as well as research from India and Kenya, this book explores the experiences of sex and sexuality in individuals and groups living with HIV in later life. Contributions consider

the impacts of stigma, barriers to intimacy, physiological sequelae, long-term care, undetectability, pleasure and biomedical prevention (TasP and PrEP). With the increasing global availability of ARVs and ageing populations, this book offers essential future directions, practical applications and implications for both policy and research. The 1999 Seattle protests united a broad range of constituencies, including conservative labor unions (Teamsters) and radical environmentalists (Turtles) in the fight for global justice. This work examines the global anti-corporate movement itself and then looks at nine other movements that might constitute possible constituencies for a larger movement of the future, providing insight into left protest politics in America. Chapter authors, mainly academics in political science, were chosen for their personal involvement in the movements they write about. Berg teaches political science at Suffolk University, UK. Annotation copyrighted by Book News, Inc., Portland, OR. Confronting the psychological, social, sexual, legal, and political issues at stake in the coming-out process, *Acts of Disclosure: The Coming-Out Process of Contemporary Gay Men* uses research findings and first-hand accounts to help gay adolescents and men accept and embrace their sexual identity as an integral part of their being. Offering helpful advice and specific suggestions that will guide you through the coming-out process, this text also teaches family, friends, and colleagues how they can support and encourage you in this challenge. A roadmap through the confusing process of coming to terms with your sexuality both privately and publicly, *Acts of Disclosure* walks you step-by-step through the stages of coming out, the emotions involved, the potential pitfalls, and the kinds of receptions you may meet. It points out both healthy and self-destructive coping strategies and teaches you how to take responsibility for your sexuality. You will find its discussions straightforward, honest, and direct, as it broaches the following topics: coming out in American schools expressing your sexual identity on the job the harmful effects of involuntary public exposure why some parents adjust better than others to the fact that they have a gay child the damaging effects of social myths attached to homosexuality the emotional and behavioral reactions wives have after discovering that their husbands are gay how to anticipate a possible "outing" against oneself and the advantages of coming out to prevent such an act compulsory social programming that may be deeply injurious to gay adolescents disclosing your sexual identity after the onset of AIDS Gay males of all ages, parents, friends, children, therapists, psychologists, social workers, and educators

who read *Acts of Disclosure* will realize their error in treating gay sexual identity as undesirable, shameful, or second-rate. As you turn the last page of this comprehensive and enlightening book, you will likely find yourself with an appreciation of gay male sexuality as well as with a better understanding of the complexities of human nature. *The Advocate* is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States. A moving exploration of how gay men construct their identities, fight to be themselves, and live authentically. It goes without saying that even today, it's not easy to be gay in America. While young gay men often come out more readily, even those from the most progressive of backgrounds still struggle with the legacy of early-life stigma and a deficit of self-acceptance, which can fuel doubt, regret, and, at worst, self-loathing. And this is to say nothing of the ongoing trauma wrought by AIDS, which is all too often relegated to history. Drawing on his work as a clinical psychologist during and in the aftermath of the epidemic, Walt Odets reflects on what it means to survive and figure out a way to live in a new, uncompromising future, both for the men who endured the upheaval of those years and for the younger men who have come of age since then, at a time when an HIV epidemic is still ravaging the gay community, especially among the most marginalized. Through moving stories—of friends and patients, and his own—Odets considers how experiences early in life launch men on trajectories aimed at futures that are not authentically theirs. He writes to help reconstruct how we think about gay life by considering everything from the misleading idea of “the homosexual,” to the diversity and richness of gay relationships, to the historical role of stigma and shame and the significance of youth and of aging. Crawling out from under the trauma of destructive early-life experience and the two epidemics, and into a century of shifting social values, provides an opportunity to explore possibilities rather than live with limitations imposed by others. Though it is drawn from decades of private practice, activism, and life in the gay community, Odets's work achieves remarkable universality. At its core, *Out of the Shadows* is driven by his belief that it is time that we act based on who we are and not who others are or who they would want us to be. We—particularly the young—must construct our own paths through life. *Out of the Shadows* is a necessary, impassioned argument for how and why we must all take hold of our futures. Offers practical advice for gay men on exercise, diet, medical care, relationships, and other topics *Mediated Intimacy* looks at contemporary sex and

relationship advice, exploring how our intimate lives are shaped through different media, from manuals and magazines to television and Twitter. By exploring how intimacy is constructed through different media texts, the authors consider which ideas and practices these changing forms of 'sexpertise' open up, and which they close down. The book reveals the intimate operation of power in mediated advice, how words and images, stories and sound can work to shore up social injustice. It critically engages with the ideas of choice and responsibility in sex self-help, arguing that these can obscure and/or justify oppression, even if they're sometimes experienced as empowering and/or pleasurable. This bold and incisive book provides a radical challenge to the assumptions underlying the sex advice industry, and presents a critical, collaborative and consensual vision for sex advice of the future. HIV Plus offers the latest stories on research, economics, and treatment. The magazine raises awareness of HIV-related cultural and policy developments in the United States and throughout the world. The revelation of being HIV positive continues to be a discourse fraught with meaning. In *Infecting the Treatment: Being an HIV-Positive Analyst*, Gilbert Cole offers an intimate and deeply insightful examination of disclosure of his HIV seropositivity on his analytic sense of self and on his clinical work with patients. Cole begins his journey of discovery by meditating on the meanings that being HIV positive have had for him, and by situating these personal meanings within the multiple meanings of HIV seropositivity generated by our culture, leading to a clinical discussion of the pros and cons of disclosure to one's patients. What begins as a consideration of disclosure of an ostensibly medical fact, opens to an exploration of the broader problematic of disclosure in the context of questions of sameness and difference, of dependence and autonomy, and of the ethical ground of psychoanalytic practice. He illuminates these issues by circling back to his own predicament, which took the form of an apparent conflict between his self-image as a psychoanalytic therapist committed to a psychoanalytic treatment approach and aspects of his self-experience that seemed uncomfortably dissonant with this identity and this commitment. He approached resolution of this conflict when he became able to use his HIV seropositivity as a metaphor for aspects of the treatment process. Comprising Cole's personal engagement of the issues inherent in being an HIV-positive analyst, his report of clinical work attendant to disclosure of his condition, and a research project compiling the experiences of other HIV-positive analysts, *Infecting the Treatment* is an intimate and deeply

insightful examination of the impact of one analyst's disclosure of HIV seropositivity on his analytic sense of self. With admirable candor and uncommon thoughtfulness, Cole shows how the analyst's disclosure of information of the most meaningful sort may deepen and even transform the therapeutic dialogue. On a summer night in 2007, the Azure Party, part of Sydney's annual gay and lesbian Mardi Gras, is underway. Alongside the party outfits, drugs, lights, and DJs is a volunteer care team trained to deal with the drug-related emergencies that occasionally occur. But when police appear at the gates with drug-detecting dogs, mild panic ensues. Some patrons down all their drugs, heightening their risk of overdose. Others try their luck at the gates. After twenty-six attendees are arrested with small quantities of illicit substances, the party is shut down and the remaining partygoers disperse into the city streets. For Kane Race, the Azure Party drug search is emblematic of a broader technology of power that converges on embodiment, consumption, and pleasure in the name of health. In *Pleasure Consuming Medicine*, he illuminates the symbolic role that the illicit drug user fulfills for the neoliberal state. As he demonstrates, the state's performance of moral sovereignty around substances designated "illicit" bears little relation to the actual dangers of drug consumption; in fact, it exacerbates those dangers. Race does not suggest that drug use is risk-free, good, or bad, but rather that the regulation of drugs has become a site where ideological lessons about the propriety of consumption are propounded. He argues that official discourses about drug use conjure a space where the neoliberal state can be seen to be policing the "excesses" of the amoral market. He explores this normative investment in drug regimes and some "counterpublic health" measures that have emerged in response. These measures, which Race finds in certain pragmatic gay men's health and HIV prevention practices, are not cloaked in moralistic language, and they do not cast health as antithetical to pleasure. Empirically, this book is a case-study analysis of dissolution processes in German AIDS organizations. Indeed, why is it that civic organizers start out with a commitment to a cause but end up dissolving their organization? This question is exactly what Kleres seeks to tackle within *The Social Organization of Disease*. Focusing on the emotional bases of dissolved German AIDS organizations to develop a typology of civic action and organizing, Kleres presents a perspective on non-profit organizations that analyses organizational development through the emotional sense making of individual organizers, within the light of larger political processes and cultural contexts. To this end, this volume develops

and applies a new methodology for researching emotions empirically, expanding the scope of narrative analysis. However, parallel to this, *The Social Organization of Disease* also explores how shifting discursive processes establish emotional climates and thus impact on state policies and the evolution of AIDS organizing. The book would appeal to sociologists and political scientists working in the field of social movements and non-profit organisations: but it would also appeal to those who are interested in the sociology of emotions. It would potentially be of interest to non-profit scholars who consider community-based organizations, volunteerism and advocacy, and secondarily, to medical sociologists interested in AIDS service organizations. Sociology, International relations, Social Work, Political Science. May be of interest for NGO-activists and/or employees and leadership. *We Are Having This Conversation Now* offers a history, present, and future of AIDS through thirteen short conversations between Alexandra Juhasz and Theodore Kerr, scholars deeply embedded in HIV responses. They establish multiple timelines of the epidemic, offering six foundational periodizations of AIDS culture, tracing how attention to the crisis has waxed and waned from the 1980s to the present. They begin the book with a 1990 educational video produced by a Black health collective, using it to consider organizing intersectionally, theories of videotape, empowerment movements, and memorialization. This video is one of many powerful yet overlooked objects that the pair focus on through conversation to understand HIV across time. Along the way, they share their own artwork, activism, and stories of the epidemic. Their conversations illuminate the vital role personal experience, community, cultural production, and connection play in the creation of AIDS-related knowledge, archives, and social change. Throughout, Juhasz and Kerr invite readers to reflect and find ways to engage in their own AIDS-related culture and conversation. First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company. This is the incredible story of how, while lying in a Neurological ICU bed, I was visited by the Holy Spirit in my dreams and accepted the Light of celibacy over the lifestyle of homosexuality. I was 57 when it all happened and so very unsatisfied with my choice to be actively sexual with other men, a part of me knew that it was wrong. Up until being visited by the Holy Spirit, I had never really had a religious or spiritual event that I could definitely define, other than the occasional doubt about my choices. You will not find that I feel in any way that being a homosexual is at all a choice, anymore than I find heterosexuality to be a choice; the choice comes when you decide to

engage in unclean sexual acts, such as fornication, adultery, polygamy and homosexuality, for examples. I want this book to breathe the truth, from a gay man's experience, not from the experience of someone who has no idea what it is to be burdened with this unchosen (for most) affliction. I want this book to be used as an out-reach to other members of the LGBTQ+ Community as an alternative to immersing themselves in whatever lifestyle the abbreviation stands for to them. There is a choice to be made. I hope this book to help others make a more spiritually and emotionally satisfactory decision. Christians: You will never win over an LGBTQ+ person to the teachings and living the life as The Christ would have one to live by using hate or guilt or shame or politics as weapons. "Be gentle as doves and clever as serpents," Christ says. Win them over by loving them, if they be your enemies or seen as enemies of Christ/God; and this book will hopefully give them the confirmation that they need, that what they "feel" really is not choice, but how they act upon those feelings is a choice. Each day, everyone makes choices, and they are either in accordance with Christ's teachings or they are not. Not one of us is without sin. I would like to see churches and/or individuals purchasing the book to give to members of the LGBTQ+ Community and ask them to simply read it; or to friends or family members that belong to the Rainbow Community as a gift from their heart and soul, not to belittle them or pages of telling them that they're headed for an eternity of Hell Fire. My book focuses on the rewards of choosing a life of celibacy over living the life of, particularly, a gay man or even a transgender person (as I have tried to be one and then the other). It is a book about respect, from both sides of the sexual-orientation coin. Without that respect, there is zero hope, none. Time has proven this over and over. The basic core of being part of the LGBTQ+ cannot be unlearned because it was never learned anymore than the ability to see. How, in the sixties and seventies, during my formative years, could I "choose" to be an effeminate child and later identify as "Gay" when all I was EVER exposed to was Heterosexual in nature, from Billboard ads to TV shows? Read my book, share it with other heterosexuals to help them understand and stop this "us" against "them" mentality. As to thoughts or dreams that I may have that are sexual in nature (the same holds true for every heterosexual) that is saddening to Christ, I must pray to be forgiven for them, that's all; that, and pour all my love into the teachings of Christ and the glory of the Holy Spirit, and to helping other LGBTQ+ members to leave this illusional, often delusional, lifestyle they have chosen for one of total celibacy, forgiveness, agape (love), and Peace both within and

without. I hope every Christian can find a way to use my book to change a person's life, literally, forever. Thank you, J. E. Webb

In a globalized society, individuals in business, government, and a variety of other fields must frequently communicate and work with individuals of different cultures and backgrounds. Effectively bridging the culture gap is critical to success in such scenarios. *Cross-Cultural Interaction: Concepts, Methodologies, Tools, and Applications* explores contemporary research and historical perspectives on intercultural competencies and transnational organizations. This three-volume compilation will present a compendium of knowledge on cultural diversity and the impact this has on modern interpersonal interactions. Within these pages, a variety of researchers, scholars, professionals, and leaders who interact regularly with the global society will find useful insight and fresh perspectives on the field of cross-cultural interaction.

Dry Bones Breathe: Gay Men Creating Post-AIDS Identities and Cultures breaks new ground in offering an original and insightful interpretation of gay men's shifting experience of the AIDS epidemic. From *Dry Bones Breathe*, you'll gain a deeper understanding of current community debates focused on circuit parties, unprotected sex, and gay men's sexual cultures, and you will learn how social, political, and biomedical changes are dramatically transforming gay identities and cultures. *Dry Bones Breathe* is Eric Rofes' explosive follow-up to *Reviving the Tribe*, a book which broke open debates in gay communities around the world about sex, identity, and gay men's relationship to AIDS. In this volume, Rofes contends that most gay men no longer experience AIDS as the crisis they did during the 1980s. Gay men often attribute this shift to the advent of protozoa inhibitors, but Rofes explains how other factors, including the epidemic's predicted trajectory, new treatments for opportunistic infections, the passage of time, and the increasing diversity of gay men inhabiting communities throughout the country have set in motion the transformation of gay life. AIDS organizations and gay leaders, however, continue to assert that gay men experience AIDS as an emergency, resulting in a tremendous dissonance between gay leaders and their communities. In the midst of this controversy, *Dry Bones Breathe* lets you share in stories of hope and recovery and a new vision for AIDS work that demands a radical redesign of prevention, care, and activism. *Dry Bones Breathe* tackles several other issues concerning the powerful shifts occurring in gay communities and cultures by: explaining why an understanding of the terms "post-AIDS" and "post-crisis" is crucial to interpreting contemporary gay male cultures and what Australian

prevention theorists have to offer gay men in the United States describing the "Protozoa Moment" and exploring how a dangerous obsession with pharmaceuticals is leading many to mistakenly attribute all changes in gay men's cultures to combination therapies examining the writings of Larry Kramer, Andrew Sullivan, Michelangelo Signorile, and Gabriel Rightly to illustrate how the crisis construct has unleashed a backlash against gay sexual cultures discussing the dramatic diminution in gay men's AIDS-related deaths in epicenter cities and the impact of shrinking obituary pages on gay men's mental health exploring the diverse relationships to the epidemic forged by young gay men, gay men of color, gay men from rural or small towns, and middle-aged men not infected with HI detailing how HI prevention and service organizations targeting gay men must redesign their mission and restructure their workIn response to continuing efforts to direct gay men back into a state of emergency, *Dry Bones Breathe* suggests that long-term prevention efforts must be constructed around something other than a crisis. While AIDS organizations look at gay men's diminished participation in AIDS activism, Rofes argues that these organizations should face how they have distanced themselves from the reality of most gay men's lives. From stories and experiences full of hope, anger, sadness, and strength, *Dry Bones Breathe* will teach you about gay men who no longer base their identities and cultures solely around AIDS. "This book examines and forms strategies to respond to the particular needs of gay men living with non-HIV chronic illnesses and disabilities such as diabetes, cancer, obesity, and muscular sclerosis. Bringing together the interdisciplinary expertise and unique perspectives of leaders in social work, psychology and rehabilitation counseling, *Gay Men Living with Chronic Illnesses and Disabilities* discusses key issues from theoretical, clinical, practical, and personal perspectives. With extensive, up-to-date bibliographies at the end of each chapter and case studies that illuminate its theoretical discussions, this book is essential reading for those involved in health policy and practice with gay men living with chronic illnesses and disabilities." --Book Jacket. What if your life was spinning out of control? Where would you turn? On silent meditation retreat deep in the Thai jungle, a Brazilian feminist, a neurotic French scientist and a ruthless Ukrainian businessman are struggling to find peace. As the world around them falls silent, their inner voices become louder, clamouring for their attention, seeding doubt and dysphoria. Over the course of ten mosquito-ravaged nights and ten achingly uncomfortable days, their deepest fears begin to overpower them. Will any of them survive

to restore the balance, happiness and prosperity they have come to seek? Or will their past lives bury them forever? “Enthralling to the end... a grippingly intense, yet beautiful read” – Emma Carmichael, author of *Driving Tito* In examining the shifting narratives of sexual identity in the 20th and 21st centuries and their impact on the process of human social development, this edited volume fuses historical, cultural, and psychological perspectives on human sexuality to articulate a rigorous interdisciplinary approach to the study of sexual lives. This three-volume set is a rich resource for readers in any discipline interested in understanding the global, regional, and domestic experiences of LGB people. This interdisciplinary set makes a vital contribution to understanding how LGB rights are progressing—and in some cases, regressing—around the globe. The three volumes look at the lived experiences of LGB people from varied perspectives and provide comprehensive coverage on a wide variety of topics ranging from LGB youth and LGB aging to the approaches to LGB people of different religions, including Islam, Judaism, and Christianity. Chapters focus on topics including the ongoing criminalization of same-sex sexual conduct and how international human rights law can be used to improve the lives of LGB people. Particular attention is paid to the rights of bisexuals, a group often ignored in works focusing on sexual orientation. Volume 1 focuses on history, politics, and culture relating to LGB people; Volume 2 focuses on the laws—domestic and international—governing LGB people; and Volume 3 provides snapshots of the current state of LGB experience in countries worldwide, presented by geographical region: Europe, the Americas, Africa, the Middle East and the Asia Pacific region. Includes contributions on the experience of LGB people in countries and regions that are extremely hostile to sexual minorities, including Russia, Iran, the Caribbean, Zimbabwe, and Uganda. Considers a multitude of factors that influence LGB people's quality of life, including, health, education, the economy, technology, religion, and the law. Offers comprehensive domestic, regional, and international accounts, serving as a one-stop source for in-depth, quality global research on LGB people. Addresses the intersectionality of discrimination based on sexuality and race, religion, and age. In *Reframing Bodies*, Roger Hallas illuminates the capacities of film and video to bear witness to the cultural, political, and psychological imperatives of the AIDS crisis. He explains how queer films and videos made in response to the AIDS epidemics in North America, Europe, Australia, and South Africa challenge longstanding assumptions about

both historical trauma and the politics of gay visibility. Drawing on a wide range of works, including activist tapes, found footage films, autobiographical videos, documentary portraits, museum installations, and even film musicals, Hallas reveals how such “queer AIDS media” simultaneously express both immediacy and historical consciousness. Queer AIDS media are neither mere ideological critiques of the dominant media representation of homosexuality and AIDS nor corrective attempts to produce “positive images” of people living with HIV/AIDS. Rather, they perform complex, mediated acts of bearing witness to the individual and collective trauma of AIDS. Challenging the entrenched media politics of who gets to speak, how, and to whom, Hallas offers a bold reconsideration of the intersubjective relations that connect filmmakers, subjects, and viewers. He explains how queer testimony reframes AIDS witnesses and their speech through its striking combination of direct address and aesthetic experimentation. In addition, Hallas engages recent historical changes and media transformations that have not only displaced queer AIDS media from activism to the archive, but also created new witnessing dynamics through the logics of the database and the remix. Reframing Bodies provides new insight into the work of Gregg Bordowitz, John Greyson, Derek Jarman, Matthias Müller, and Marlon Riggs, and offers critical consideration of important but often overlooked filmmakers, including Jim Hubbard, Jack Lewis, and Stuart Marshall. Discover how gay men’s health care can be improved! Smearing the Queer: Medical Bias in the Health Care of Gay Men explores how social prejudices embedded in scientific research and practice often act as a detriment to gay men’s health. This book provides an agenda for addressing heterosexism in the health sciences and in medical care while broadening approaches to gay male wellness beyond the limited scope of HIV infection. This groundbreaking book explore a number of neglected concerns affecting the sexual health of gay men , calling for the recognition of their scientific, political, and cultural significance. In Smearing the Queer, gay men, HIV prevention workers, health care providers, mental health professionals, policymakers, researchers, and instructors in related fields will appreciate the in-depth examination of such issues as: research and development on rectal microbicides why many gay men should be receiving periodic anal Pap smears to screen for anorectal cancer an in-depth critique of the problematic diagnosis of “Gay Bowel Syndrome” gay men’s use of the Reality Female Condom for anal sex Viagra’s impact on gay men’s sexual cultures, erectile dysfunction, and recreational drug use a broad-based

advocacy agenda for improving relations between gay men and the health sciences the politics surrounding gay men's restricted access to new and prospective safer sex technologies Smearing the Queer challenges heterosexist bias within the health care delivery and health sciences research and calls for the development of public policy initiatives that address gay men's wellness in more sophisticated and complex ways. This is the only publication that provides in-depth social, cultural, and political analysis of the topics of Gay Bowel Syndrome, gay men's use of the female condom, rectal microbicides, and anal Pap smears while examining the social forces that direct scientific research under the guise of objectivity. Michel Foucault's notion of "biopower" has been a highly fertile concept in recent theory, influencing thinkers worldwide across a variety of disciplines and concerns. In *The History of Sexuality: An Introduction*, Foucault famously employed the term to describe "a power bent on generating forces, making them grow, and ordering them, rather than one dedicated to impeding them, making them submit, or destroying them." With this volume, Vernon W. Cisney and Nicolae Morar bring together leading contemporary scholars to explore the many theoretical possibilities that the concept of biopower has enabled while at the same time pinpointing their most important shared resonances. Situating biopower as a radical alternative to traditional conceptions of power—what Foucault called "sovereign power"—the contributors examine a host of matters centered on life, the body, and the subject as a living citizen. Altogether, they pay testament to the lasting relevance of biopower in some of our most important contemporary debates on issues ranging from health care rights to immigration laws, HIV prevention discourse, genomics medicine, and many other topics. The book is designed to enable students of public policy, policymakers and managers to obtain useful information and conduct successful systematic evaluations, even under tight resource constraints. This text presents a wide variety of approaches to evaluation through brief, authoritative articles by top academics and practitioners. Thoroughly revised and updated this third edition is filled with the most current information, up-to-date examples, and puts increased emphasis on practical applicability. The third edition also features a new and up-dated instructor's manual. *Marketing Public Health: Strategies to Promote Social Change* was designed to help public health practitioners understand basic marketing principles and strategically apply these principles in planning, implementing, and evaluating public health initiatives. The first edition has been widely used by public health practitioners at all levels of government

and in the private sector as a tool to help run more effective campaigns to change individual behavior, improve social and economic conditions, advance social policies, and compete successfully for public attention and resources. This thoroughly revised, second edition includes new case studies, written by respected and well-known guest contributors from the front lines and will help illustrate the principles and strategies in a way that makes it immediately apparent to readers how the material can be used in modern, real-life public health campaigns. Current themes in the social marketing world, such as the concept of branding, have also been incorporated into the book in both its narrative and its case studies and examples.
