Alfred's Basic Adult Piano Course Sight Reading, Bk 1 Jul 12 2022 This book teaches sight reading in a systematic way by creating exercises based on the same concepts that the student is studying in the Lesson Book. Exercises are short and the music is generally easier than correlating pages in the Lesson Book.

Planning Lessons and Courses Dec 05 2021 This book deals with the kinds of everyday questions working teachers face as they plan lessons and courses. Each chapter contains an analysis of the issue under discussion, as well as practical principles and sample activities.

Crash Course Feb 19 2023 "The inspiring true story of a teacher's experiences with her students and the life lessons she learned that can help others find joy and success. Crash Course chronicles the life lessons that Kim Bearden has learned during an

award-winning career in education that has spanned three decades. Kim has taught more than 2,000 students, and each has shown her something about the world and the abundant capacity for love, resilience, and appreciation that we all possess. By sharing her students' stories, she teaches their inspiring lessons to us all. Throughout the ups and downs of her professional and personal life, Kim found that her students were the light that illuminated her path; they were her sanctuary in the storm. From her challenges as a first year teacher, to her triumphs as the cofounder of the highly acclaimed Ron Clark Academy, Kim shares how children can teach each of us the importance of building relationships, abandoning fear, embracing one's unique gifts, and living with passion. Full of honesty, humor, heartbreak, and humanity, Kim's experiences show how children can help any one of us, despite life's obstacles, find the joy and significance in both our personal and professional lives"--

Learning How to Learn Jan 26 2021 A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: • Why sometimes letting your mind wander is an important part of the learning process •

How to avoid "rut think" in order to think outside the box • Why having a poor memory can be a good thing • The value of metaphors in developing understanding • A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Drawing and Painting the Landscape Jun 18 2020 Capturing the landscape on paper requires the artist to look - to look deep into the distance and deep into the soul. This practical book celebrates the genre of landscape painting - the wonder of discovering

the extraordinary in the everyday scene. Philip Tyler looks in detail at the materials, techniques and approaches needed to paint the landscape, and offers advice on how to portray space, light, atmosphere and different weather conditions. Supported by the words and images of other notable artists, he explains how to transfer one's emotional response to the landscape onto paper or canvas. There are exercises to support the 50 lessons in the book and over 300 colour images illustrate the text.

Deep Learning for Coders with fastai and PyTorch Aug 13 2022 Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy, speed, and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by PyTorch cofounder, Soumith Chintala
