Vicarious Trauma and Disaster Mental Health Jun 21 2020
Vicarious Trauma and Disaster Mental Health focuses on the clinician and the impact of working with disaster survivors. Floods, hurricanes, tornadoes, mass shootings, terrorism and other large-scale catastrophic events have increased in the last decade and

disaster resilience has become a national imperative. This book explores vicarious traumatization in mental health providers who respond to massive disasters by choice or by circumstance. What happens when clinicians share the trauma and vulnerability from the toll taken by a disaster with the victims they care for? How can clinicians increase resilience from disaster exposure and provide mental health services effectively? Vicarious Trauma and Disaster Mental Health offers insight and analysis of the research and theory behind vicarious trauma and compares and contrasts with other

work-impact concepts such as burnout, compassion fatigue and secondary traumatic stress. It proposes practical evidence-informed personal strategies and organizational approaches that address five cognitive schemas (safety, esteem, trust, control and intimacy) disrupted in vicarious trauma. With an emphasis on the psychological health and safety of mental health providers in the post-disaster workplace, this book represents a shift in perspective and provides a framework for the promotion of worker resilience in the standard of practice in disaster management.

Yatdjuligin Apr 19 2020
Yatdjuligin: Aboriginal and Torres Strait Islander Nursing and Midwifery Care introduces students to the fundamentals of the health care of Indigenous Australians from the perspectives of both the patient and the professional. Designed for both non-Indigenous and Indigenous nurses and midwives who will work with Aboriginal and Torres Strait Islander patients, this book addresses the relationship between Aboriginal and Torres Strait Islander cultures and mainstream

health services, and prepares students for practice in a variety of contexts. Fully updated to reflect the latest research, this new edition includes new chapters on child health and mental health. Updated online resources provide lecturers with resources to support student learning. Written by leading Aboriginal and Torres Strait Islander nursing and midwifery academics and practising nurses, Yatdjuligin is an indispensable resource that encourages students to reflect on their values and attitudes towards Indigenous people and health.

Psychological First Aid Jan 17 2020

This manual is designed to orient helpers to offer psychological first aid (PFA) to people following a serious crisis event. PFA involves humane, supportive and practical assistance for people who are distressed, in ways that respect their dignity, culture and abilities. The instructions and materials in this manual are for a half-day orientation (4 hours excluding

breaks) to prepare helpers to support people recently affected by very stressful events. If you have more time available for the orientation, extra activities and slides are included in text boxes to deliver a full day orientation (five and a half hours excluding breaks). Where possible, one should organize full day orientations to allow for deeper learning. It is important to adapt the orientation and materials to the local culture, language and context, and to the likely kinds of crisis situations in which your participants would be helping. This facilitator's manual is to be used together with Psychological First

Aid: Guide for Field Workers.

The Skilled Communicator in Social Work Mar 19 2020 A vital part of a social worker's role is to build strong relationships based on confidence and trust, with people across all stages of the life course and from a broad range of backgrounds, in what can be extremely challenging circumstances. In this, her latest collaboration with Palgrave, bestselling social work author Karen Healy turns her attention to the key topic of communication and the importance of developing into a skilled communicator across all areas of

professional practice. Split into two distinct sections, the text provides a thorough exploration of: - The foundations of effective communication in social work practice, focusing on the basic knowledge and skills that are essential to forming working alliances with service users in a broad range of practice situations; and - The specialised communication skills required to work with people with specific capacities and needs - from children, young people and older adults to people from diverse cultures and linguistic groups, those who

experience trouble with verbal communication and those with mental health challenges. With helpful learning features such as practice exercises and chapter summary questions to enable you to review and reflect on what you have learned, this is an essential resource for social work students new to this complex area of practice. *How to study in Australia on Scholarship* Dec 28 2020 This is part of an updated info series on how to go to college/university for free. Mental Health Challenges in Elite Sport:

Balancing Risk

with Reward Dec 16 2019 Elite sport typically provides obvious rewards in terms of recognition, finance and acclaim for athletic performance. Increasingly, we are becoming aware of the risks that elite athletes, their entourage, including families, sport-science support team and coaches are exposed to. Twelve original articles, seven commentaries and a corrigendum, are structured in a five chapter format. Chapter 1, comprising the

Editorial, is titled “An Overview of Mental Health in Elite Sport: Changing the Play Book” to reflect the advocacy role of this article. Chapter 2 (“Finding the Sweet Spot”) amplifies the voice of key stakeholders across three qualitative studies with three additional commentaries. Quantitative evidence is presented in Chapter 3 which has the sub-title the “State of Play.” Chapter 4, entitled the “Field of Play”, includes three original publications which present contrasting conceptual approaches to guide researchers in hypothesis generation,

formulation and implementation science. Finally, in Chapter 5, “Seeing the Ball Early”, prospective perspectives are provided in three publications reinforced by two commentaries. The future thinking ideas includes the use of virtual reality training, a broadening of the concept of mental health literacy, tackling stigma and focusing on the potential positive effect of the natural environment on well-being and recovery. To date the research topic has generated widespread in the field. For example, several articles have generated an Altmetric score above 40 with one publication

meriting an Altmetric score of 102. We envisage that the impact of this e-book will not simply be measured in citations, views, downloads nor social media impact, but in the discourse that emerges from this collection of contributions from a combined total of 53 authors from across three continents. It is our hope that this e-book, providing a snapshot of global challenges for elite athletes mental health and well-being, becomes a touchstone for researchers and practitioners in the field.

**Handbook of
Australian School
Psychology** Jun 14

2022 This handbook addresses the current state and practice of school psychology with a focus on standards unique to Australia, including historical, legal, ethical, practical, and training factors. It provides a compilation of the most current research-based practices as well as guidelines for evidence-based assessment and intervention for common conditions (e.g., autism, depression, learning disabilities) and for delivering appropriate services to targeted student populations (e.g., LGBT, gifted,

medical issues). Chapters discuss the application of national and international school psychology practices within the Australian educational and psychological structure. The handbook also examines the lack of formal resources specific to Australia's culture and psychology systems, with its unique mix of metropolitan cities and the vast geographic landscape that spans regional and remote areas. It offers numerous case studies and innovative school mental health programs as well as recommendations for professional development and advocacy that are

unique to Australian school psychology. Topics featured in this Handbook include: Evidence-based assessment and intervention for dyscalculia and mathematical disabilities. Identification and management of adolescent risk-taking behaviors and addictions. Understanding and responding to crisis and trauma in the school setting. Prevention and intervention for bullying in schools. Class and school-wide approaches to addressing behavioral and academic needs. The role of school psychologists in the digital age. Practical advice for school psychologists facing

complex ethical dilemmas. The Handbook of Australian School Psychology is a must-have resource for researchers, scientist-practitioners, and graduate students in child and school psychology, social work, and related fields that address mental health services for children and adolescents.
