Covers all aspects of working with Access 2010, from the customizable Ribbon and Themes to conditional formatting, advanced web database publishing to SharePoint collaboration For everyone who wants to get the most out of Access 2010, from hobbyists to power users to corporate developers As a diesel, liberty, and self-reliance enthusiast, Mark A. Billy wanted the family and load hauling capabilities of a full sized truck without the horrible fuel economy or the excessive

price. As an engineer, he understood the efficiency and torque that turbodiesel engines provide. He knew that his goals were achievable if the right decisions were made. So, he decided to build a practical hauler for his family that wouldn't break the bank. He started with an unusual host for an efficiency project: a large, heavy, brick-shaped 1999 Suburban. He integrated a 3.9 liter Isuzu turbodiesel engine and a five-speed manual transmission into this vehicle, creating a cavernous family conveyance that cruises at highway speeds while achieving 26 mpg. The Suburban retains functional four wheel drive, cruise control, and air conditioning. Because a mechanically-injected engine and a manual transmission were used, the drivetrain of the vehicle is EMP-proof. With a 40 gallon fuel tank, the vehicle can achieve a range of over 1000 miles without refueling. This book describes the author's decision-making process as he chose, modified, and installed

the components in his conversion process. He shares a number of lessons he learned the hard way, in the hopes that sharing his experience will make it easier for others to pursue similar projects.

Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the

out-of-print Ducati Super Bikes: 851, 888, 916. This book chronicles the development and history all five Ducati Corse World Superbike generations together with interviews with the designers, racers and team managers. This unique insight is provided by renown motorcycle racer and journalist Alan Cathcart who has had the opportunity to test ride every one of the race bikes over the last 25 years
