Readings in Management Accounting Feb 19 2023 A compilation of recent business press and academic articles designed to accompany Atkinson/Banker/Kaplan Young, Management Accounting. Each section of the book is introduced with a summary of the articles and their overall contribution to the topics. Each reading concludes with a set of questions designed to provoke thought and analysis on the part of the student. The Instructor's Guide details at what juncture each of the articles can be used with the main text.

Accounting May 10 2022 Like the other titles in Barron's Business Review Series, the new sixth edition of Accounting makes a useful supplement to college textbooks, and is also excellent as a main text in business brush-up programs. Author Peter J. Eisen familiarizes students with key accounting terms, explains the accounting equation, and goes on to instruct in the use and preparation of financial statements, the recording of business transactions in journals, and in closing and adjusting entries at the end of a business period. The book is organized to closely follow a standard college textbook, but concentrates on student understanding of what is done, and, more importantly, how and why. Other helpful features include: Review questions Computational problems with complete detailed solutions presented when appropriate Additional problems to reinforce the reader's knowledge An extensive glossary of accounting terms. New features in this edition include instruction in the use of spreadsheets to solve many accounting problems, a more detailed explanation of accounting data procedures as internal controls designed to safeguard assets, and extensive commentary on business ethics.

Financial Accounting PDF ebook 6th Edition Apr 28 2021 'This book will be welcomed by students and academics alike. The text is easy to read and well laid out, the case studies are very helpful, and it is supplemented by a good range of quality supporting material' Christopher Coles, Department of Accounting and Finance, University of Glasgow 'A hugely enjoyable and informative book with an international focus' Eleimon Gonis, University of the West of England, Bristol Financial Accounting is the ideal book for anyone with little prior knowledge or who is new to this subject area. The book retains the clear writing style and unique international focus which led to the success of previous editions. This approach enables the teaching of financial accounting in a way that is not country-specific. This fully updated text uses the International Financial Reporting Standards (IFRS) as its framework to explain key concepts and practices while linking them with contemporary real-life examples from around the world. What's new! Fully updated to reflect the extensive changes that have occurred in the three years since writing the fifth edition; Expanded discussion of accounting by SMEs and partnerships (Chapter 4); New discussion on capital maintenance (Chapter 8); Added material on integrated reporting and sustainability (Chapter 6); Expanded discussion of revenue recognition, including reference to IFRS 15 (Chapter 8). The text is ideal for undergraduates and MBA students worldwide taking a first course in financial accounting.
