Culture transformation expert Siobhan McHale defines culture simply: “It’s how things work around here.” The secret to the success or failure of any business boils down to its culture. From disengaged employees to underserved customers, business failures invariably stem from a culture problem. In *The Insider’s Guide to Culture Change*, acclaimed culture transformation expert and global executive Siobhan McHale shares her proven four-step process to demystifying culture transformation and starting down the path to positive change. Many leaders and managers struggle to get a handle on exactly what culture is and how pervasive its impact is throughout an organization. Some try to change the culture by publishing a statement of core values but soon find that no meaningful change happens. Others try to unify the culture around a set of shared goals that satisfy shareholders but find their efforts backfire as stressed employees throw their hands up because “leadership just doesn’t get it.” Others implement expensive new IT systems to try to bring about change, only to find that employees find “workarounds” and soon go back to their old ways. *The Insider’s Guide to Culture Change* walks readers through McHale’s four-step process to culture transformation, including how to: Understand what “corporate culture” really is and how it impacts every aspect of the way your organization operates Analyze where your culture is broken or not adding maximum value Unlock the power of reframing roles within your company to empower and engage your employees Utilize proven methods and tools to break through deeply embedded patterns and change your company mind-set Keep the momentum going by consolidating gains and maintaining your foot on the change accelerator With *The Insider’s Guide to Culture Change*, watch your employees go from followers to change leaders who drive an agile culture that constantly outperforms. Colleges and universities stand to benefit greatly when businesspeople engage with them, whether through governing boards, alumni associations, consulting arrangements, philanthropy, or other channels. But many businesspeople are frustrated by the way institutions of higher education work--or rather, how they don't work. Why do decisions in universities take so long and involve so many people? Why aren't profit and growth top priorities for colleges? Why can't the faculty be managed like any other employees? Shouldn't alumni have a greater say as they continue to invest in their alma mater? As leaders in higher education, James W. Dean Jr. and Deborah Y. Clarke have years of experience addressing these questions for a wide range of professionals outside the academy. This book draws on their expertise to offer real-world guidance for businesspeople who work with and seek to improve colleges and universities. Dean and Clarke differentiate and clarify the motivations and structures that make universities unique among American enterprises. And while they acknowledge the challenges that businesspeople often face when working with academic institutions, they explain that understanding the distinct mission of higher education is essential to being able to effect change within these organizations. Presenting insights from interviews with a wide range of stakeholders, Dean and Clarke give succinct and practical advice for working with universities. Your Travel Destination. Your Home.
