Casebook of Clinical Geropsychology Jun 01 2021

Geropsychology - the field of psychology concerned with the psychological, behavioural, biological, and social aspects of aging - has developed rapidly in the past decade. This clinical casebook describes current best practice in managing complex cases involving common mental health issues in later life, by leading authorities in the field.

Genetic Counseling for Adult Neurogenetic Disease Feb 15 2020 The adult patient diagnosed with or at risk for a neurogenetic disease has many questions and concerns for the genetic counselor, the neurologist, and other practitioners. Because of the emotional and potentially life-altering impact of these diseases on the patient and family, counseling can be especially challenging. A rare hands-on guide to the subject, Genetic Counseling for Adult Neurogenetic Disease deals with core issues that differentiate adult neurogenetic counseling from its more familiar pediatric counterpart. This innovative book with accompanying videos is designed to fill in deficits in this area typical of training programs in genetic counseling (which have pediatrics and prenatal concentrations) and neurology (which rarely cover genetic counseling). For each condition featured, chapters include a detailed overview of genetic symptoms, diagnostic criteria, and management, plus guidelines for asking, and answering, pertinent questions. The major concentration, however, is on genetic counseling issues and case histories illustrating these issues. As an added dimension, the accompanying videos depict representative issues and challenges in genetic counseling for specific diseases in addition to the basics of a neurological examination. Among the conditions discussed: Movement disorders, including Parkinson's disease. Dementias, including Alzheimer's disease. Stroke. Motor neuron diseases. Neuropathies and channelopathies. Adult muscular dystrophies. Neurocutaneous syndromes. Plus a section on neurological and neuropsychological evaluation. This is information that will stay relevant as technologies change and genetic understanding evolves.

Genetic Counseling for Adult Neurogenetic Disease offers advanced clinical wisdom for genetic counselors as well as neurologists, neuropsychologists, and other referring clinicians.

Cognitive Therapy in Clinical Practice Jul 02 2021 This volume contains examples of how cognitive therapists working in varied settings with groups of adult clients have applied the cognitive model in their domain. Cognitive therapy has much broader application than the traditional area of depression; contributors illustrate the way they work by using extended case material, readers will hear the voices of the clients and empathise with both client and therapist as they seek to build a collaborative relationship. Areas discussed range from drug abuse and eating disorders to obsessive behaviour. Any therapist, however experienced, will learn from 'listening in' on the cases presented and students will find it essential reading.

Improving Health Care in Low- and Middle-Income Countries Sep 04 2021* This open access book is a collection of 12 case studies capturing decades of experience improving health care and outcomes in low- and middle-income countries. Each case study is written by healthcare managers and providers who have implemented health improvement projects using quality improvement methodology, with analysis from global health experts on the practical application of improvement methods. The book shows how frontline providers in health and social services can identify gaps in care, propose changes to address those gaps, and test the effectiveness of their changes in order to improve health processes and outcomes. The chapters feature cases that provide real-life examples of the challenges, solutions, and benefits of improving healthcare quality and clearly demonstrate for readers what quality improvement looks like in practice: **Addressing Behavior Change in Maternal, Neonatal, and Child Health with Quality Improvement and Collaborative Learning Methods in Guatemala Haiti's*

National HIV Quality Management Program and the Implementation of an Electronic Medical Record to Drive Improvement in Patient Care
Scaling Up a Quality Improvement Initiative: Lessons from Chamba District, India
Promoting Rational Use of Antibiotics in the Kyrgyz Republic
Strengthening Services for Most Vulnerable Children through Quality Improvement Approaches in a Community Setting: The Case of Bagamoyo District, Tanzania
Improving HIV Counselling and Testing in Tuberculosis Service Delivery in Ukraine: Profile of a Pilot Quality Improvement Team and Its Scale-Up Journey
Improving Health Care in Low- and Middle-Income Countries: A Case Book will find an engaged audience among healthcare providers and administrators implementing and managing improvement projects at Ministries of Health in low- to middle-income countries. The book also aims to be a useful reference for government donor agencies, their implementing partners, and other high-level decision makers, and can be used as a course text in schools of public health, public policy, medicine, and development. **ACKNOWLEDGMENT:**This work was conducted under the USAID Applying Science to Strengthen and Improve Systems (ASSIST) Project, USAID Award No. AID-OAA-A-12-00101, which is made possible by the generous support of the American people through the U.S. Agency for International Development (USAID). **DISCLAIMER:**The contents of this book are the sole responsibility of the Editor(s) and do not necessarily reflect the views of USAID or the United States Government.

An Ethics Casebook for Hospitals Dec 07 2021 Originally published in 1999, this classic textbook includes twenty-six cases with commentary and bibliographic resources designed especially for medical students and the training of ethics consultants. The majority of the cases reflect the day-to-day moral struggles within the walls of hospitals. As a result, the cases do not focus on esoteric, high-tech

dilemmas like genetic engineering or experimental protocols, but rather on fundamental problems that are pervasive in basic healthcare delivery in the United States: where to send a frail, elderly patient who refuses to go to a nursing home, what role the family should play in making a treatment decision, what a hospital should do when it is getting stuck with too many unpaid bills. This thoroughly revised and updated second edition includes thirteen new cases, five of which are designated as "skill builder" cases aimed specifically at persons who wish to conduct clinical ethics case consultations. The new cases highlight current ethical challenges that arise in caring for populations such as undocumented immigrant patients, persons with substance use disorders involving opioids, and ethical issues that arise beyond the bedside at the organizational level. The reader is invited to use the supplemental videos and assessment tools available on the website of the Loyola University Chicago ACES project (www.LUC.edu/ethicsconsult).

Casebook on Human Dignity and Human Rights Oct 05 2021

The Price We Pay Jul 22 2020 New York Times bestseller Business Book of the Year--Association of Business Journalists From the New York Times bestselling author comes an eye-opening, urgent look at America's broken health care system--and the people who are saving it--now with a new Afterword by the author. "A must-read for every American." --Steve Forbes, editor-in-chief, FORBES One in five Americans now has medical debt in collections and rising health care costs today threaten every small business in America. Dr. Makary, one of the nation's leading health care experts, travels across America and details why health care has become a bubble. Drawing from on-the-ground stories, his research, and his own experience, The Price We Pay paints a vivid picture of the business of medicine and its elusive money games in need of a serious shake-up. Dr. Makary shows how so much of

health care spending goes to things that have nothing to do with health and what you can do about it. Dr. Makary challenges the medical establishment to remember medicine's noble heritage of caring for people when they are vulnerable. The Price We Pay offers a road map for everyday Americans and business leaders to get a better deal on their health care, and profiles the disruptors who are innovating medical care. The movement to restore medicine to its mission, Makary argues, is alive and well--a mission that can rebuild the public trust and save our country from the crushing cost of health care.

***NMS Surgery Casebook* Feb 21 2023** Ideal as a stand-alone review or as a companion to *NMS Surgery*, this highly practical casebook presents a series of surgical cases that begin with a clinical scenario and progress step by step through the decision-making process of patient management. It offers medical students a structured subject review, practice questions to prepare for the USMLE Step 2 exam, and an opportunity to work through clinical cases with a unique "what next" approach to decision making. Updates include a new two-color design, "Deep Thoughts" and "Quick Cuts" text features that clearly call out high-yield information in every chapter, and an all-new chapter on pediatrics covering common congenital anomalies. Clinical images and illustrations offer the opportunity to detect visual clues, and the new pocket-sized format makes it easy to carry and study anytime, anywhere. In addition, this title is packaged with access to the interactive eBook version at no additional cost Provides an excellent review for exams and an opportunity to practice real-world clinical decision making. Features a new, two-color design and a handy new pocket-sized format. Emphasizes high-yield information with easy-to-spot "Deep Thoughts" and "Quick Cuts" boxes throughout. Contains a new pediatrics chapter that brings you up to date with common congenital anomalies. Includes case variations so you can consider patients with

complications or co-existing conditions. Uses an extensive illustration program that provides opportunities to make patient management decisions based on visual cues. The perfect companion to Jarrell's NMS Surgery, 6th Edition.

The Aneurysm Casebook Nov 06 2021 This encyclopedic reference book on the treatment of intracranial aneurysms offers a case-based approach to the subject that has the benefit of fully reflecting the highly individual technical and clinical challenges encountered in aneurysm patients. The book is structured by aneurysm location, ensuring ease of use. Readers will find solutions for most clinical situations that they may encounter. Different treatment strategies are described, highlighting their respective pros and cons in particular circumstances. The coverage encompasses both basic techniques, such as coil occlusion and parent vessel occlusion, and the latest developments, including extra- and intrasaccular flow diversion, intrasaccular flow disruption, bifurcation stenting, and hybrid procedures combining microsurgical and endovascular elements. Potential procedural complications are identified, and bail-out strategies to anticipate, avoid, and solve major issues are described. The authors are all respected experts in the field, and the book will be of value to vascular and endovascular neurosurgeons, interventional neuroradiologists and neurologists, stroke neurologists, and other practitioners at all levels of experience.

The Neuropsychology Fact-finding Casebook Mar 30 2021 Formal training in clinical neuropsychology introduces trainees to diverse patient populations with a variety of conditions and disorders. Learning to competently apply a structured, fact-finding approach to case conceptualization, differential diagnosis, and treatment planning is an essential goal at all levels of training. This approach provides a valuable exercise and method of examining practitioner competence. The structured approach to case analysis promotes good clinical decision

making, and exercises based on such an approach can help prepare clinicians for the oral exams that are a part of board certification. The **Neuropsychology Fact-Finding Casebook** is a resource for both supervisors and trainees in clinical neuropsychology, as well as for clinicians preparing for board certification. The volume provides 24 compelling and diverse fact-finding cases, one for each month of a two-year residency. Each case is presented in a stepwise fashion: presenting problem and referral question, background information and patient report, behavioral observations, and test findings. At the end of each case, a summary, diagnostic impression, recommendations, and questions are provided to assess, reinforce, and teach core competencies; an outcome section describes what occurred after the full case evaluation is completed; and critical teaching points are discussed. This Casebook is a standardized approach to fact-finding that training programs at various levels can use to help trainees develop such evaluation skills.

Casebook on Ethical Issues in International Health Research Jan 28 2021 I. Defining "research"--II. Issues in study design . -- III. Harm and benefit -- IV. Voluntary informed consent -- V. Standard of care -- VI. Obligations to participants and communities -- VII. Privacy and confidentiality -- VIII. Professional ethics.

SimWars Simulation Case Book: Emergency Medicine Aug 03 2021 The definitive repository of emergency medicine simulation cases for the emergency medicine physician.

Ethics Rounds: a Casebook in Pediatric Bioethics Mar 18 2020 Pediatric medical ethics are very different from any other clinical setting. This collection presents possible cases and scenarios to help caregivers be better-prepared for complicated ethical questions.

Adult Critical Care Medicine Jan 16 2020 This clinical casebook provides a comprehensive yet concise state-of-the-art review of adult critical care medicine. Presented in a case-based format, each case focuses on a scenario

commonly encountered with an adult patient in the ICU. Case scenarios include management of seizures and acute intracranial hypertension, sepsis, liver failure, brain death, bleeding and thrombosis, and treating hospital acquired infections in the ICU. Written by experts in the field, *Adult Critical Care Medicine: A Clinical Casebook* is a valuable resource for critical care specialists and practitioners who treat adult patients in critical care settings.

NMS Surgery Casebook Jun 13 2022 Lippincott® Connect Featured Title Purchase the new print edition of this Lippincott® Connect title includes lifetime access to the digital version of the book, plus related materials such as videos and multiple-choice Q&A and self-assessments. Ideal as a stand-alone review or as a perfect companion to *NMS Surgery, Seventh Edition*, this leading casebook for the surgical rotation presents a series of surgical cases that begin with a clinical scenario and progress step by step through the decision-making process of patient management. Concise and portable, *NMS Surgery Casebook, Third Edition* fits in a lab coat pocket—ideal for review on the wards. Retaining the structured subject review, practice questions for the USMLE Step 2 exam, and focus on helping students work through clinical cases with a unique “what next” approach to decision making, this third edition offers a new full color design, new study aids, and key updates throughout.

The LGBT Casebook Nov 25 2020 The LGBT Casebook provides a general overview and roadmap for clinicians new to treating LGBT individuals, and it deepens and updates knowledge for those already seeing these patients in their practices.

Foreign Relations and National Security Law Nov 13 2019 *Foreign Relations and National Security Law: Cases, Materials, and Simulations* contains classic cases from *Foster v. Nielsen* to *Samantar v. Yousuf* and penetrating commentary from *The Federalist* to Dean Harold Koh and Justice Antonin Scalia. The title's treatment of thought-

**provoking controversies includes: The intervention in Libya
WikiLeaks disclosures The killing of Osama bin Laden
Drone attacks on U.S. nationals NSA wiretapping
Guantánamo trials Excerpts of treaties, statutes, and
executive orders address the core doctrinal and theoretical
issues of foreign relations law and national security law,
providing ample room for professors to design a course
based on those topics most suited for their classroom
experience.**

***Treatment of Bipolar Illness* Oct 17 2022 “Robert Post is one of the modern pioneers and towering figures in the investigation and treatment of bipolar illness. This volume is a master class in bipolar disorder.”—Russell T. Joffe, MD, Professor of Psychiatry, New Jersey Medical School. This landmark work, based on years of systematic clinical trials and observations at the National Institutes of Mental Health (NIMH) and elsewhere, is the definitive clinical resource on patients with difficult-to-treat bipolar disorder. In the most comprehensive compendium to date, Post and Leverich, both veteran clinicians and expert researchers on bipolar disorder, take a broad, long-term view of the illness rather than simply looking at the short-term manic episodes that so traditionally typify the disorder. In doing so, they present an authoritative primer on the life course and treatment of bipolar disorder, including issues of remission, recurrence, and the nuances so critical to effective clinical decision-making in protracted treatment. Presenting over 60 individual case studies covering a broad range of patients and treatment approaches, Post and Leverich equip clinicians with countless examples to draw on when working with patients in their own practices.**

Casebook on benefit and harm Jan 08 2022

Clinical Psychology Casebook Across the Lifespan Mar 10 2022 This book illustrates the multifaceted applications of clinical psychology in multi-cultural contexts. It considers people’s emotional, cognitive, interpersonal and psychological development across their lifespans. The book

explores nine multicultural clinical cases that illustrate clinical assessment, biopsychosocial formulation, and evidence-based therapy. Further, it provides therapy outcomes for diverse clients throughout their lifespans, e.g. for cognitive behavioral therapy, integrative therapy, and narrative therapy; and examines clinical findings on e.g. social and emotional development, family trauma, child sexual abuse and its impact, as well as culturally sensitive assessment and interventions for a range of mental health issues. Further cases focus on co-morbid conditions, and physical ailments, across the lifespan. Bringing together contributions from both academics and practitioners, the book illustrates practical applications of theories and concepts relevant to the practice of clinical psychology. It also reviews the relevant literature with clinical recommendations, and provides multicultural perspectives and insights into contemporary clinical approaches from experienced clinical supervisors and practitioners, who are also academics and educators in the field. Accordingly, the book offers a valuable asset for students, academics, researchers and practitioners, as well as for postgraduate clinical training.

Ethical Issues in International Biomedical Research May 12 2022 Ethical Issues in International Biomedical Research is the definitive book on the ethics of research involving human subjects in developing countries. Using 21 actual case studies, it covers the most controversial topics, including the ethics of placebo research in Africa, what benefits should be provided to the community after completion of a research trial, how to address conflicts between IRBs in developed and developing countries, and undue inducement of poor people in developing countries. Each case is accompanied by two expert commentaries, written by many of the worlds leading experts in bioethics as well as new voices with research experience in developing countries. No other volume has this scope. Students in bioethics, public and international health, and

ethics will find this book particularly useful.

Acute Care Casebook Sep 16 2022 Acute Care Casebook provides a case-based approach to the broad practice of acute care medicine, covering a variety of common patient presentations and clinical environments. This book features over 70 illustrated cases, including presentations of trauma and medical illness in wilderness medicine, military and prehospital environments, pediatrics, emergency medicine, and intensive care unit and floor emergencies. Designed for students and trainees in medicine, nursing, EMS, and other acute care specialties, this text guides readers through not only symptom evaluation and treatment, but also the thought process and priorities of experienced clinicians. Each chapter features key diagnoses and management pearls from leading experts that will help prepare readers for any event, from stabilizing and transporting a trauma patient in the field, to managing post-operative complications in the ICU.

Postpartum Mental Health Disorders: a Casebook Aug 23 2020 "Postpartum Mental Health Disorders: A Casebook describes the recognition and management of psychiatric disorders that present in the postpartum period. Case vignettes illustrate the type of complaints that may present to the psychiatrist, primary care physician, obstetrician, nurse practitioner, doula or other health care professionals. Chapters cover depression, anxiety disorders, obsessive compulsive disorder (OCD), psychotic disorders, bipolar disorders, posttraumatic stress disorders, personality disorders and drug abuse. Each chapter includes information about differential and provisional diagnoses, epidemiology, treatment and prognosis with advice as to when to refer to a specialist. More general chapters address risk factors for developing postpartum disorders, prevention and the uses and safety of psychotropic medication during breastfeeding. Two frequently used screening questionnaires are included with instructions as to use. Some key references or links are

included"--

Ethical Conundrums, Quandaries and Predicaments in Mental Health Practice Dec 15 2019 Is it ethical to treat a death row inmate only to stabilize him or her for eventual execution? What happens when a military provider receives highly sensitive intelligence from a client? How can clinicians refuse costly gifts from clients without damaging the therapeutic relationship? Should a therapist disclose a client's suicidal intent to the authorities? In Ethical Conundrums, Quandaries and Predicaments in Mental Health Practice, these and other real-life scenarios constitute a comprehensive and definitive ethics casebook for mental health professionals. Inspired by the many difficult situations they themselves have faced, an eminent group of accomplished mental health clinicians provide first-hand accounts of ethical problems that defy boilerplate solutions. Each chapter begins with a compelling and ethically complex case followed by an illustrative yet succinct analysis of the key ethical issues present and a personal reflection on the case itself, along with the process of ethical reasoning used to arrive at a final decision. Every case concludes with key recommendations for promoting ethical practice within an often challenging work setting. Highlighting the human aspect of ethics in mental health practice through the use of mesmerizing narratives while also provoking the reader to reflect upon what is the "right" thing to do, Ethical Conundrums, Quandaries and Predicaments in Mental Health Practice offers trainees and seasoned professionals alike invaluable informative models for dealing with ethical dilemmas, as well as the inspiration to confront seemingly insurmountable clinical problems.

NMS Surgery Casebook Apr 18 2020 Designed as a companion volume to the popular NMS Surgery, this newly conceptualized casebook presents a series format of surgical cases that begin with a clinical scenario and go through the decision-making process of patient

management step-by-step. Chapter contents are parallel to other surgical texts, yet are organized and closely cross-referenced to NMS Surgery. The book visually corresponds to the NMS text, too, and contains 205 line drawings and 115 tables. This new complementary casebook offers medical students a structured subject review, practice questions, and an opportunity to work through clinical cases.

***Clinical Casebook of Couple Therapy* Jul 14 2022 An ideal supplemental text, this instructive casebook presents in-depth illustrations of treatment based on the most important couple therapy models. An array of leading clinicians offer a window onto how they work with clients grappling with mild and more serious clinical concerns, including conflicts surrounding intimacy, sex, power, and communication; parenting issues; and mental illness. Featuring couples of varying ages, cultural backgrounds, and sexual orientations, the cases shed light on both what works and what doesn't work when treating intimate partners. Each candid case presentation includes engaging comments and discussion questions from the editor. See also *Clinical Handbook of Couple Therapy, Fourth Edition*, also edited by Alan S. Gurman, which provides an authoritative overview of theory and practice.**

Practicing Psychodynamic Therapy Feb 26 2021 This volume presents 12 highly instructive case studies grounded in the evidence-based psychodynamic therapy model developed by Richard F. Summers and Jacques P. Barber. Bringing clinical concepts vividly to life, each case describes the patient's history and presenting problems and takes the reader through psychodynamic formulation, treatment planning, and the entire course of therapy, including the challenges of termination. The cases address a variety of core psychodynamic problems, with outcomes ranging from very successful to equivocal. The emotional experience of the therapist is explored throughout. Commentary from Summers and Barber on every case

highlights important points and key clinical dilemmas. See also the authored book *Psychodynamic Therapy: A Guide to Evidence-Based Practice*, in which Summers and Barber comprehensively describe their therapeutic model.

***The Addiction Casebook* Feb 09 2022 The Addiction Casebook presents 12 patients with DSM-5 addiction diagnoses -- plus one experiencing problematic Internet use -- and illustrates practical and successful strategies for diagnosing and treating these patients. The book's cases are analogous to those that clinicians commonly encounter in their everyday practice and effectively demonstrate the intersection of addiction with other psychiatric diagnoses. The experience and clinical wisdom of three generations of addiction specialists are distilled into a single volume that includes the most salient ideas and treatment suggestions for clinicians. This informative, practical volume strikes a colloquial, and sometimes humorous, tone. General psychiatrists and psychiatric residents seeking to gain expertise in and an understanding of addiction will find it a delight to read, as will a diverse audience of family practitioners, internists, pediatricians, medical students, allied professionals, and anyone interested in sharpening her or his clinical skills. The book is the first to cover the diagnosis, assessment, and treatment of substance use disorders and other addictions within the DSM-5® framework. Its many valuable and helpful features include An outline of the progression in thinking about psychiatric diagnoses with the move from DSM-IV-TR® to DSM-5®. Descriptions of hands-on experience with the current diagnosis and treatment of substance use disorders and other addictions that complement substance abuse textbooks and bring the material to life. Coverage of such subject areas as alcohol, caffeine, cannabis, hallucinogen, inhalant, opioid, sedative, hypnotic, anxiolytic, stimulant, tobacco, gambling, and Internet addictions. Key points and multiple-answer questions at the end of each chapter that highlight the chapter's most pertinent takeaways and apply**

and strengthen readers' knowledge of chapter information. Extensive use of tables, figures, charts, and other instructive materials to illuminate and clarify addiction concepts. In their preface, the authors assert their hope that the book "will provide the fundamental tools for working with the substance-using patient in the hospital, the clinic, and the community." The Addiction Casebook exceeds its goal by providing mental health and other medical practitioners with timely, current strategies for addiction diagnosis and treatment in a succinct, engaging, and entertaining volume.

Doctor Turner's Casebook Aug 15 2022 Call The Midwife is the BBC's most popular drama ever - that is what viewing figures tell us with over ten million viewers per episode. The Christmas edition is always reviewed as a 'must see' event, just as important to some families as the Queen's Speech. All the principal actors are now household names and one in particular over the past two seasons has dramatically come to the front of the show - Doctor Turner, played by Stephen McGann. He is now seen as the lynchpin of the series, not only overseeing the many childbirths across episodes, but also dealing with a multitude of diseases that strike the young, as accurately portrayed by the show's writer Heidi Thomas. Polio, meningitis, measles, scarlet fever and thalidomide have all been meticulously depicted on the show. This new book, will now reveal how a local doctor - such as Dr Turner - not only dealt with such cases, but also how he worked within the newly created National Health Service, as well as lived alongside his East End community. It will be a facsimile as well as a fictionalised diary from the character, all conceived and written by the show's writer Heidi Thomas. Stephen McGann will also contribute his own narrative having studied for an MA in medical science. Beautifully designed, it will make a lovely present for any fan of the series, as well as those wishing to find out more about the history of what life was really like in this period.

Regulation Oct 25 2020 This casebook introduces the theory and practice of regulation. Using rich, ready-to-use materials, the book integrates classic and contemporary concepts in regulation, illustrating their significance to legal practice, society, and the economy. A pioneering casebook, authored by a leading scholar of regulation, offers an overview of concepts and analytical tools used in most areas of law, laying the necessary foundation for regulatory and statutory analysis. Tested in the classroom, the book offers a framework for a first-year or upper-level course. The book is designed to familiarize students with a wide range of regulatory and statutory materials and analytical techniques. Students have the opportunity to appreciate jurisprudential developments in regulation through classic cases such as *Munn*, *The Slaughter-House Cases*, *Lochner*, *New State Ice*, and the 2012 *National Federation of Independent Business*, as well as the study the Great Recession and financial bubbles.

Social Marketing Casebook Sep 23 2020 Electronic Inspection Copy available for instructors here **Social Marketing Casebook** brings together for the first time a dedicated collection of social marketing case studies and vignettes from around the world. Each case study is explored from the scoping and research stage right through to evaluation, providing the reader with a complete overview of the most important building blocks in social marketing and how these can be applied to the real world, including: - Insights from the key people involved in social marketing and the identification of the common themes associated with successful social marketing strategies. - An international range of cases from the health, environmental and civic sectors, from national and governmental programmes to local, small-budget interventions; - Comprehensive coverage of the whole process, from strategy, and implementation, through to the challenges and lessons learned; and - Academic exercises, discussion questions and references to reinforce student

learning. This book demystifies social marketing for undergraduate and postgraduate marketing and health studies students, as well as practitioners in government, public institutions, NGOs and private organisations looking to develop more effective social change programmes.

NMS Medicine Casebook Jan 20 2023 Organized by subspecialty, this case-based review covers all the information students are expected to learn during their internal medicine clerkship. Each topic begins with a brief patient history and a question about the most likely diagnosis or next step in management followed by a discussion of alternative diagnoses and management strategies. The user-friendly approach includes numerous algorithms, images, mnemonics, and tables. A companion Website will offer the fully searchable text.

The Middleboro Casebook May 20 2020 The Middleboro Casebook: Healthcare Strategy and Operations is an integrated case study focused on the fictional community of Middleboro and the seven healthcare organizations that serve it, including two hospitals, a long-term care facility, a home health agency, two physician group practices, and a local health department. A thorough examination of Middleboro and its demographic, socioeconomic, political, epidemiological, and environmental data and characteristics enables students to analyze the community in detail, focusing on those factors that drive the need for and use of healthcare services as well as framing the strategic decisions made by healthcare organizations.

Surgery Dec 19 2022

Pharmacotherapy Casebook: A Patient-Focused Approach, 9/E Jun 20 2020 More than 150 cases help develop the skills you need to identify and resolve the most common drug therapy problems The perfect study companion to DiPiro's Pharmacotherapy: A Pathophysiologic Approach More than 40 all-new cases! Pharmacotherapy Casebook: A Patient-Focused Approach delivers 157 patient cases designed to teach you how to apply the principles of

pharmacotherapy to real-world clinical practice. The case chapters in this book are organized into organ system sections that correspond to those of the DiPiro textbook. By reading the relevant chapters in Pharmacotherapy: A Pathophysiologic Approach you will be able to familiarize yourself with the pathophysiology and pharmacology of each disease state included in this casebook. Each case teaches you how to: Identify real or potential drug therapy problems Determine the desired therapeutic outcome Evaluate therapeutic alternatives Design an optimal individualized pharmacotherapeutic plan Develop methods to evaluate the therapeutic outcome Provide patient education Communicate and implement the pharmacotherapeutic plan Everything you need to develop expertise in pharmacotherapy decision making: Realistic patient presentations include medical history, physical examination, and laboratory data, followed by a series of questions using a systematic, problem-solving approach Compelling range of cases - from the uncomplicated (a single disease state) to the complex (multiple disease states and drug-related problems) Diverse authorship from more than 190 clinicians from nearly 100 institutions Coverage that integrates the biomedical and pharmaceutical sciences with therapeutics Appendices containing valuable information on pharmacy abbreviations, laboratory tests, mathematical conversion factors, anthropometrics, and complementary and alternative therapies

National Security Law Nov 18 2022 This timely casebook provides a complete exploration of both constitutional and domestic law issues of national security, blended with cases, notes, questions, and original materials. The best-selling casebook in the field, National Security Law, Third Edition, Is both current and comprehensive. Some of the effective features that earned the book its leading position include: a cohesive thematic framework that examines policy And The consequences surrounding American use of

force, intelligence operations, and counterterrorism efforts rich primary materials, such as judicial opinions, executive correspondence, statutes, and legislative history penetrating hypothetical questions that prompt analysis of the actual issues faced by national security professionals plentiful descriptive text to supply context and informative historical and background materials Material in the Third Edition is especially important in light of current national security issues: Part III, devoted to terrorism and transnational law enforcement, includes the original Osama bin Laden case, American-Arab Anti-Discrimination Committee v. Reno, and materials on consequence management extensive coverage throughout the book of the terrorist attacks of September 11, 2001 with legal analysis of U.S. And international responses U.S. military involvement in Columbia U.S. And NATO activity in Kosovo

Surgical Recall Apr 30 2021 Now in its Sixth Edition, Surgical Recall allows for rapid-fire review of surgical clerkship material for third- or fourth-year medical students preparing for the USMLE and shelf exams. Written in a concise question-and-answer format—double-column, question on the left, answer on the right—Surgical Recall addresses both general surgery and surgical subspecialties. Students on rotation or being PIMPed can quickly refer to Surgical Recall for accurate and on-the-spot answers. The book includes survival tactics and tips for success on the boards and wards as well as key information for those new to the surgical suite.

Casebook Apr 11 2022 Spying and eavesdropping on his separating parents at the side of his best friend, young Miles wonders about a stranger's role in his parents' lives before acquiring knowledge that has consequences for the whole family. 25,000 first printing.

Research Ethics Consultation Oct 13 2019 Interesting and important ethical questions confront researchers, regulators, institutional review boards, support personnel, and research participants committed to the ethical conduct

of human subjects research at all stages of research. Questions encompass - but are not limited to - study design, enrolling participants, balancing the clinical needs of participants against the research agenda, ending trials, discharging post-trial obligations, and resolving conflicts. Straightforward solutions to these types of questions are often not found in regulations, ethics codes, or the bioethics literature. These resources may leave room for interpretation, offer conflicting guidance, or simply fail to address particular questions. Ethics consultation, which has been offered in clinical care settings with regularity since the 1980s, has since the turn of the century increasingly been sought in the clinical research context. Because there has only lately been recognition that ethics consultants can play a valuable role helping the research community conduct research in the most ethically informed way, there are many open questions in the field of research ethics consultation including the appropriate role of consultants and the best methods of consultation. The Clinical Center Bioethics Consultation Service has been serving the NIH community of researchers, administrators, healthcare providers, and research participants for more than a decade, conducting nearly 1,000 consultations in that time. In this book, members of the Bioethics Consultation Service reflect on this long track-record and unparalleled range of research ethics consultations to share a collection of their most interesting and informative research ethics consultations and to start a dialogue on remaining open questions. Although the NIH experience is unique, this book focuses on cases - and associated lessons - that are generalizable and valuable for the entire clinical research community. This book will be valuable to ethics consultants, clinical investigators, students and teachers, and others desiring insight into clinical research ethics and ethics consultation.

Cardiovascular Surgery Dec 27 2020 This clinical casebook is comprised of surgical cases involving the most important

cardiovascular diseases in a concise, easy-to-read format (5x8 in trim size, like other titles in this burgeoning, informal product line in the Springer clinical medicine program). Each chapter is a case that opens with a unique clinical presentation, followed by a description of the diagnosis, assessment and management techniques used to treat it, as well as questions and answers (between 8 and 10) about relevant aspects related to the diagnosis and treatment of the addressed disease. The Q&A section will broaden discussion and increase the title's pedagogical value. The casebook features 40 surgical cases in the following thematic areas: Aortic Disease, Arrhythmias, Cardiac Tumors, Coronary Insufficiency, Congenital Heart Disease, Endovascular Therapies, Heart Failure, Heart Transplantation, Mechanical Circulatory Support, Pericardial Disease, Pulmonary Embolism and Valvular Heart Disease. This book will be prepared by the Brazilian Department for Academic Leagues of Cardiovascular Surgery, within the Brazilian Society of Cardiovascular Surgery (BSCVS). This department is the section within BSCVS that consists of the academic leagues of cardiovascular surgery from each university throughout the country. In Brazil, medical academic leagues are organizations that gathers students, interns and residents to discuss a certain topic and promote research and teaching-oriented extra-class activities, supervised by a group of professors. Thus trainees will have involvement in writing the chapters and the senior professor supervisors will edit and finalize the work. Basically, each chapter is written by an intern or resident and, ultimately, his/her supervisor. As the books volume editors, doctors Almeida and Jatene will have final responsibility for the cases and overall manuscript.
